ACKNOWLEDGMENTS

The reconciliation of terminology from many specialized areas of pictorial collections would not have been possible without suggestions from colleagues in libraries, museums, and archives who reviewed the list. We extend thanks to everyone who made comments and are particularly grateful to several individuals who contributed numerous ideas:

Georgia Bumgardner (American Antiquarian Society); Kathleen Collins, Terri Echter, Joyce Nalewajk, Barbara Orbach, Stephen Ostrow, Ford Peatross, Carol Pulin, Bernard Reilly, and Renata Shaw (Library of Congress); Lynn Cox (Alabama Archives); Jackie Dooley (University of California, San Diego); Christine Hennessey (National Museum of American Art); David Horvath (University of Louisville); Waverly Lowell and John Maounis (National Maritime Museum); Toni Peterson (Art and Architecture Thesaurus); Sara Shatford and Elaine Svenonius (University of California, Los Angeles); Joe Springer (Goshen College); Amy Stark (Center for Creative Photography); Gerald Stone (Public Archives of Canada); and Larry Viskochil (Chicago Historical Society).

We are also grateful for the support of the Association of College and Research Libraries Rare Books and Manuscripts Standards Committee.

> Helena Zinkham and Elisabeth Betz Parker August 1986

INTRODUCTION

I. BACKGROUND

Access to graphic materials in libraries and archival collections has been limited traditionally to retrieval by subject content and names of creators. Although catalog records often include information on genre and physical characteristics, researchers usually have no ready access to it. A student of lithography, for example, is compelled to consult books for names of printmakers likely to have produced lithographs, then to search a library's catalog of prints for artists' names, and, finally, examine each catalog record to find those for lithographs. An architect requiring 19th century framing drawings to aid a building restoration must review long sets of records or handle countless drawings to find framing drawings rather than floor plans. A scholar investigating the cultural impact of photographically illustrated books is forced to rely on a few published bibliographies, in-house example files, staff memory, and chance discoveries to locate examples of such works. As graphic collections grow and catalog records accumulate, it is clear that additional access points would greatly facilitate research related to functional categories, production contexts, and artifactual aspects of graphic materials.

A single list of standard terms from which catalogers and researchers can choose indexing and retrieval vocabulary is needed, along with widely accepted provisions for applying the terms as access points. The lack of such a list and quidelines is a problem because of the great variety of media and pictorial types and because of the broad range of users of graphic materials, whose knowledge and experience vary. While an extensive and often informal vocabulary is employed in the descriptive portion of the catalog record, indexing terms should be controlled. Reconciling variant terms by designating a preferred indexing term not only simplifies the cataloger's task but also makes retrieval more efficient. For example, the standard term "dry plate photonegatives" lessens confusion about "silver gelatin glass negatives," "glass plates," and "dry plates." Furthermore, the terms for indexing graphic materials can be used most effectively when presented within the structure of a thesaurus designed to establish relationships and guide users.

While Descriptive Terms for Graphic Materials: Genre and Physical Characteristic Headings (GMGPC) can be used in a variety of cataloging systems, it was created primarily in response to the needs of institutions using the communications format called Machine-Readable Cataloging (MARC) for their automated catalog records. In 1979, the Independent Research Libraries Association (IRLA) recommended in "Proposals for Establishing Standards for the Cataloguing of Rare Books and Specialized Research Material in Machine-Readable Form" the addition of two new fields to the MARC format for terms indicating genre and physical characteristics. In January 1984, the field 655 was authorized for genre headings and 755 was authorized for physical characteristic headings. These fields are now defined for all of the MARC Formats for Bibliographic Data: Books, Serials, Maps, Music, Archives and Manuscripts Control, and Visual Materials.¹

IRLA asked the Standards Committee of the Rare Books and Manuscripts Section of the Association of College and Research Libraries to develop thesauri appropriate for rare books and special collections.² The lack of vocabulary to index book illustrations led the Committee to encourage staff of the Library of Congress Prints and Photographs Division to expand and integrate several of their genre and physical description lists into a thesaurus constructed according to guidelines set out by the American National Standards Institute.³ The result is <u>Descriptive Terms for Graphic Materials: Genre and Physical</u> <u>Characteristic Headings</u> with 513 authorized terms and 290 cross references.

II. SCOPE AND PURPOSE

In the context of graphic collections, genre headings denote distinctive categories of material: an established class of pictorial types (CARTOONS), a vantage point or method of projection (BIRD'S-EYE VIEWS; PERSPECTIVE PROJECTIONS), or intended purpose (ADVERTISEMENTS; COMPETITION DRAWINGS). Some indicate characteristics of an image's creator (STUDENT WORKS) or a publication status or occasion (CENSORED WORKS; NEW YEAR CARDS). Others imply a subject but also designate a method of representation (ABSTRACT WORKS; LANDSCAPES). Terms denoting artistic movements and styles are not included in this definition of genre.

Physical characteristic headings designate graphic materials distinguished by production processes or techniques

¹MARC Formats for Bibliographic Data, starting with updates 10, 11, and 12, issued by the Library of Congress (1984-1986), includes all of the formats.

²Authorized thesauri for MARC fields 655 and 755 are listed in the Bibliography. Martha Yee (UCLA Film, Television and Radio Archives) is preparing a genre thesaurus for moving image materials.

³American National Standards Institute. <u>Guidelines for Thesaurus</u> <u>Structure, Construction, and Use: Approved June 30, 1980</u>. (New York, 1980). ANSI Z39.19-1980.

(ALBUMEN PHOTOPRINTS), production stages or versions (PROOFS; REPRODUCTIONS), instrument employed (PINHOLE CAMERA PHOTOGRAPHS; AIRBRUSH WORKS), markings (WATERMARKS), shape and size (SCROLLS; MINIATURE WORKS), and other physical aspects of graphic materials.

GMGPC terms are:

-- applicable to two-dimensional, chiefly pictorial, graphic materials (among them, prints, photographs, drawings, and ephemera) whether they are part of a book, or in a manuscript, graphic, or other collection;

-- applicable to some non-pictorial and three-dimensional material commonly found in graphic collections, such as visiting cards and photograph cases;

-- appropriate for materials commonly found in general graphic collections of research libraries and historical societies. (Thus, there are more terms for photographs and historical prints than for fine prints, drawings, and paintings. There are few terms for educational audiovisual materials.)

GMGPC terms will:

-- assist research into the development and distribution of a particular genre or technical process;

-- aid retrieval of information about aspects of graphic materials frequently requested by people who want to understand how a certain technique is performed;

-- aid selection of materials for exhibitions or class demonstrations;

-- assist collection preservation, since collections are handled less when the catalog provides more specific access;

-- help collection management by providing, for example, the means to calculate the quantity of glass phototransparencies held by an institution;

-- aid cataloging, since pinpointing a process or format may help to date or identify an image;

-- make cataloging more consistent and encourage specificity by providing standard terminology in a ready reference format;

-- assist institutions in disseminating information about their collections through database networks or other means.

Genre and physical characteristic headings will make it easier for the student of lithography to find examples of lithographs; indeed, the student could narrow the search to lithographic posters printed in Germany between 1900 and 1920. By using these headings, the architect will be able to separate out framing drawings from floor plans, and the scholar can rapidly retrieve photographically illustrated books.

III. SYNTAX AND STRUCTURE

In accordance with thesaurus construction standards, terms usually represent single concepts and are plural nouns with phrases in natural language order. English words follow American spelling practice. The thesaurus structure is intended to help both catalogers and researchers select the term(s) most appropriate for indexing and retrieval. Terms appear in three types of displays: alphabetical, classed, and hierarchical.

In the Alphabetical Display (the main list), terms are listed in word-by-word filing sequence, and scope notes define the terms in the context of the thesaurus. Associations between terms are indicated by the convention of broader, narrower, related, and "used for" relationships. Terms listed under a heading also appear in the alphabetical filing sequence with the reciprocal relationship noted. (Thus, the term EPHEMERA has LABELS listed as a narrower term, and the term LABELS has EPHEMERA listed as its broader term.)

The distinction between genre and physical characteristics is blurred with terms like BROADSIDES, in which purpose is closely identified with one physical manifestation. In order to simplify the assignment of field tags, each term was defined with an orientation to either its functional (655) or its physical (755) aspect. The distinction by field tag has most significance in computer retrieval systems which allow searches to be limited to particular fields of the record, a capability increasingly in demand as files grow. For easy reference, the terms for the two fields have been integrated into one alphabetical list with the MARC field tag indicated after each term.

Notes and relationships are abbreviated as:

- PN: public note (defines the scope of a term)
- CN: cataloger's note (guides indexers in selecting a term; for thesaurus maintenance, records other notes in which the term appears)
- UF: used for (indicates a non-preferred term, such as an alternative spelling, inverted form, or synonym; helps define a term's meaning)
- BT: broader term (indicates the more general class to which a term belongs; everything that is true of a term is also true of its broader term)
- NT: narrower term (indicates a more specific term or member of a class)
- RT: related term (brings to the user's attention terms that are associated because of overlapping meanings or part-whole relationships)
- USE: leads from a non-preferred, unauthorized form of a term to the term as used

>: indicates that one or more narrower (i.e., more specific) terms will be found under this term's own entry [655], [755]: indicates the appropriate field tag in a MARC record

Terms in square brackets (e.g., [COLOR ASPECT]) are not used for indexing. They refer the thesaurus user to the Classed Display terms.

The public note provides definitions for most genre terms but somewhat less frequently for physical characteristic terms, because dictionaries for the latter are more commonly available. The definitions have an American bias, particularly in the dates of popular usage and sizes that are cited. Most definitions have been modified to reflect their application within the context of GMGPC; none should be considered absolute. The experimental techniques and subtle variations in many graphic processes preclude complete precision.

GMGPC does not include subdivisions which may be added to a term to indicate where and when the cataloged material was made and whether it is in color. General guidelines for subdivisions are given in section V.

The <u>Classed Display</u> consists of 10 categories which offer approaches to the indexing terms not available in the Alphabetical Display (e.g., COLOR ASPECT, SHAPE & SIZE, STATUS OF PUBLICATION). Each term in the thesaurus has been assigned to one or more of these groups. The broadest terms appropriate to a particular category are listed alphabetically. When the broadest term has narrower terms which are also appropriate to the category, they appear in hierarchical order under that term. Terms at the same subordinate level are in alphabetical order.

The <u>Hierarchical Display</u> is limited to two terms (PHOTOGRAPHS and PRINTS) which have many layers and terms between the broadest term in the chain and its progressively narrower terms. Here, narrower terms appear in logically descending relationships rather than alphabetical order. This display allows quick scanning to broaden or narrow a search for the most appropriate photographic or printmaking term.

IV. TERM SELECTION AND FORMULATION

GMGPC is designed to provide terms for access to <u>cate-</u> <u>gories</u> of media and formats rather than to enumerate terms for <u>indexing</u> every conceivable aspect of graphic materials. It is not an exhaustive glossary. The degree of term specificity is meant to permit reasonably direct searches to locate the most commonly requested examples of graphic materials. Some terms for relatively rare material have been included, because materials that are commonly requested are not always commonly found items.

The need for access to categories of material outweighed the desire for access to very specific types that require great technical expertise, considerable analysis, or elaborate tests in order for the cataloger to assign a term. The identification of some processes may, in fact, depend entirely on the presence of manufacturers' labels, captions, imprints, or accompanying information. However, retrieval of some formats and physical types that are difficult to recognize cannot be neglected. For example, while it is excessive to analyze every architectural drawing for indexing by projection type, terms have been included for projections that are fairly readily identified and that could help meet the demand for study examples.

The variety of material found in graphic collections prompted some modification of ambiguous informal terminology. For example, in a purely photographic collection, the words "prints" and "negatives" may suffice. In a mixed collection or in a database of records for a variety of material, however, "prints" is better reserved for engravings and related media, while "photoprints" and "photonegatives" refer without confusion to photographs. Such formal vocabulary is necessary for indexing purposes, even though the notes in the catalog record continue to be expressed in everyday language.

Terminology was not modified in several situations. Pictorial content is not always explicit in a term name or stated in the scope note. Thus, although ENVELOPES and BALLOTS are not commonly decorated, these terms are not expressed as "pictorial envelopes" or "pictorial ballots" because it is expected that those in graphic collections are pictorial. Graphic designs and their finished products (e.g., BOOK JACKETS) are included in the same genre category, although the design work may also be indexed with DESIGN DRAWINGS. Different manifestations of an object type are also brought together under the same term. All possible physical forms of a genre are not given special terms. Thus, PLAYING CARDS includes both the cut and uncut sheets. ARCHITECTURAL DRAWINGS, which may be hand-drawn, photographic, or printed, are described only as graphic delineations. Separate headings convey the physical characteristics.

Certain types of vocabulary have been excluded. Terms which describe art movements or styles as well as those which require subjective judgment, such as documentary photographs, pictorialism, propaganda, and primitive paintings, are beyond the scope of GMGPC. Terms reflecting a discipline (e.g., "architectural photographs" or "medical illustrations") have also been excluded because it is often difficult to judge or impossible to know if a particular image was made for such purposes. It seems ineffectual to apply such terms to every photograph of a building or every anatomical drawing when the images can be approached just as well through their subject content.

Rather than enumerate an extensive variety of proprietary names that are actually part of the same generic group, few processes and techniques were designated by trade names. For example, DYE COUPLER PHOTONEGATIVES subsumes Kodacolor and Fujicolor negatives. Cross references are given for some trade names that are frequently present on the material itself, because they may serve as a beginning point for many searches. (Trade names may appear elsewhere in the catalog record.)

Other terms often used in the descriptive portion of the catalog record have also been excluded because they do not seem practical as access points. Among these are: contact photoprints, copper engravings, die-cut lithographs, gold-toned photoprints, glossy photoprints, and half-length portraits.

The complex formulation of a string of words to express a description such as "pen, pencil, ink, and graphite drawing with blue wash on laid paper" cannot be accomplished within the structure of GMGPC with its limited subdivisions and emphasis on basic categories. Separate terms were, therefore, established to designate application instruments (e.g., PENCIL WORKS). Terms that describe the primary and secondary support material were largely excluded in favor of medium designations. Since, however, the primary support may sometimes be the only distinctive feature of a photograph, terms for support were coupled with general photographic terms (e.g., CERAMIC PHOTOGRAPHS, FILM PHOTONEGATIVES). For institutions employing the MARC format, codes in the 007 field provide access to primary and secondary support materials, such as paper, glass, and wood. Information about the support material and application instrument may also appear in the physical description or note area of the catalog record.

Several genre terms (ABSTRACT WORKS, ALLEGORIES, CITYSCAPES, GENRE WORKS, LANDSCAPES, PORTRAITS, STILL LIFES, and WATERSCAPES) were combined with general physical characteristic terms (DRAWINGS, PAINTINGS, PHOTOGRAPHS, PRINTS) in order to provide a means for dividing up large files of catalog records indexed by a general term. For example, an extensive file of portraits may be broken into categories for PORTRAIT DRAWINGS, PORTRAIT PAINTINGS, PORTRAIT PHOTOGRAPHS, and PORTRAIT PRINTS.

GMGPC is predicated on a distinction being made between genre and subject. What is often called a "genre" category, such as motion picture posters, actually mixes the subject (motion picture) with the form (poster). Indeed, such combinations of topic and form are endless. Since GMGPC is designed primarily for use in automated systems in which postcoordinate searching can be done, retrieval of topic-form "genres" can be accomplished by searching for the desired subject term in the topical subject field (MOTION PICTURES, in MARC field 650) and the desired form term in the genre field (POSTERS, in MARC field 655). (See 6.6 in section V for an approach for manual systems.)

Distinctions between genre and subject may seem difficult when a literary genre does not have an equivalent pictorial genre. "Myth," for instance, is a common literary genre. A picture of a scene from a myth is not an example of that genre, but, rather, MYTHS is the subject of the image and assigned to MARC field 650.

GMGPC is not a theoretical list, but a practical representation of categories of material encountered at the Library of Congress and other extensive American historical collections. Standard reference sources and cataloging manuals (cited in the bibliography) were reviewed to find common vocabulary and determine relationship hierarchies. Some terms and their definitions were drawn from colleagues' personal knowledge. Other authorized 655/755 thesauri, the Library of Congress Subject Headings (LCSH), the 1984 draft Art and Architecture Thesaurus for Document Types, Drawings and Visual Genre, and the preliminary lists of the Architectural Drawings Advisory Group⁴ were also consulted for terms to incorporate into this graphic materials thesaurus.

None of the consulted sources could serve as a single thesaurus for the 655 or 755 fields. The distinction between object type (genre), the object itself (physical characteristic), and the subject content is not always clear and, thus, confuses the purpose of the 655, 755, and 650 fields. Because they are either too narrowly focused and detailed for highly diverse collections of graphic materials or too general in the terminology related to graphic materials, the existing lists do not have an appropriate relationship structure for the desired universe of terms. In addition, they do not include definitions or guidelines for application that would help catalogers and researchers in graphic collections use the thesaurus.

Nonetheless, an attempt was made to have terms coincide with those in other standard vocabularies, especially with terms

⁴The Art and Architecture Thesaurus and the Architectural Drawings Advisory Group are both sponsored by The Getty Art History Information Program.

in other authorized 655/755 thesauri. Although a new list, GMGPC builds on existing vocabulary in order to reduce confusion when union catalogs are searched. Some terms (e.g., CALENDARS) have been repeated in this list because of their frequent use for indexing pictorial collections. It is expected that terms for genre and physical types occurring less frequently in pictorial collections (e.g., ALMANACS or DIARIES) can be taken from the authorized 655 or 755 thesaurus most appropriate for

the particular type of non-pictorial material.

V. CATALOGING APPLICATIONS

Institutions should formulate written policies for applying 655 and 755 terms in their local systems. Networks may provide members with many necessary guidelines. Conformance to established book cataloging and indexing conventions is recommended for pictorial material; however, in some circumstances a departure from usual practice is justified. The guidelines here thus reflect practices developed in the Library of Congress Prints and Photographs Division, which may be helpful for other pictorial collections having manual, MARC, and non-MARC automated files.

GMGPC is one of the tools developed specifically to address various aspects picture cataloging. The manual <u>Graphic</u> Materials: Rules for Describing Original Items and Historical <u>Collections</u>,⁵ which supplements the <u>Anglo-American Cataloguing</u> <u>Rules</u> (2nd ed.), provides guidance for bibliographic description. The <u>LC Thesaurus for Graphic Materials: Topical Subjects</u> (forthcoming) provides an extensive list of topical subject headings which may be used in MARC field 650.

1. Level of specificity.

1.1. Indexing conventions usually prescribe assignment of the term most specific to the material being cataloged. The choice of terms also depends on the nature and intended use of the collections, the relationship of the material being cataloged to the rest of the institution's holdings, staff expertise, and whether the catalog record represents a single item or a group of items. Decisions about the level of specificity should also take into account the needs of a growing manual file or local automated database and the possibility of contributing records to a multi-institutional database.

The following examples indicate different types of specificity.

⁵Graphic Materials is available from the Cataloging Distribution Service of the Library of Congress.

Ex.: An institution has many photographs but only a few $\overline{drawings}$. The general term DRAWINGS may be adequate in relation to its other holdings, but a great variety of terms are assigned to identify and distinguish the photographic materials.

Ex.: An institution's pictorial holdings are chiefly photographic, but it is considered sufficient to distinguish only between photoprints and photonegatives because the primary access to the collection is by subject. (In this case, the 755 field may help limit a search to the photographic material as opposed to any other material, such as books.)

Ex.: An institution decides to distinguish between ENGRAVINGS and WOODCUTS but not go so far as to single out STIPPLE PRINTS.

Ex.: An institution indexes engravings and woodcuts with the broader term PRINTS. As the manual file grows, however, researchers find it difficult to pinpoint specific print processes. Contributing records to a database network may also encourage the institution to apply the same level of specificity used by other member institutions so that its records will not be overlooked.

1.2. If uncertain of a specific physical process, assign a broader term. Although terms are available for use when a process is recognized, one should not feel compelled to try to identify every process as specifically as possible in every case.

Ex.: When a color photoprint process cannot be identified, PHOTOPRINTS--COLOR may suffice.

1.3. In accordance with conventional subject indexing practice, a narrower term and its broader term should not both occur on a record for a single item. However, for a group, it may be appropriate to assign both broader and narrower terms.

Ex.: An aquatint is indexed with: AQUATINTS. The additional broader term INTAGLIO PRINTS would be superfluous.

Ex.: A group that contains mostly cyanotypes, but also has a scattering of many other photo processes, may be indexed with: CYANOTYPES and PHOTOPRINTS.

1.4. Conventional indexing rules prescribe use of the broader term when more than three of its narrower terms would be headings in the catalog record. The desire for access to examples of specific media and genre in a group may call for deviation from this practice and use of all the terms. When, however, the specific aspects are considered too numerous to index separately, either in a group or single item, the practice of using the broader term should be followed. Ex.: A group containing a photographer's work includes mostly platinum photoprints but also has a few cyanotypes and tintypes. Each type is indexed because it is important to highlight them all in the context of the institution's holdings.

Ex.: The kinds of ephemera in a scrapbook are too numerous to index separately. The general term EPHEMERA is used.

Ex.: A drawing includes graphite, chalk, and crayon, and no one medium predominates. The general term DRAWINGS is used.

2. Exhaustivity in indexing.

2.1. It is not always necessary or appropriate to assign 655 and 755 terms. An institution may decide to index only selected material to exemplify a particular genre or physical type in its collections. Even when a physical characteristic term is assigned, no genre term may be appropriate (and vice versa). In addition, pictures with clear topical subjects do not invariably need a genre term just for the sake of using the 655 field. (In fact, CITYSCAPES, GENRE WORKS, LANDSCAPES, PORTRAITS, STILL LIFES, and WATERSCAPES are 655 terms that are intended chiefly for assignment in the absence of other subject matter. They are not meant for every image of a city, domestic scene, mountain, person, or river.)

2.2. More than one term may be needed to express the various categories an item or group represents. The 655 and 755 fields are repeatable for this reason. Although without specified limits, selectivity in the number of terms assigned is recommended.

Ex.: An allegorical crayon drawing made in memory of a dead hero and intended to illustrate a magazine article, but then never published, is indexed with: ALLEGORICAL DRAWINGS (655), MEMORIAL WORKS (655), PERIODICAL ILLUSTRATIONS (655), PROPOSED WORKS (655), and CRAYON DRAWINGS (755).

3. Double indexing.

3.1. When a genre frequently has the same physical characteristics associated with it, both aspects are not necessarily indexed.

Ex.: Most POSTCARDS (655) are PHOTOMECHANICAL PRINTS (755), and many CATALOGS (655) are PAMPHLETS (755). In such cases, the 655 term may be sufficient.

Ex.: For a less common combination of genre and physical characteristic, such as photographic postcards, both POSTCARDS (655) and SILVER GELATIN PHOTOPRINTS (755) are used.

3.2. The same principle applies to terms for the instrument of application. Since most GRAPHITE DRAWINGS are made with pencils, it is not necessary to index under PENCIL WORKS unless there is a particular reason to draw attention to that aspect.

3.3. Terms are related in the thesaurus (RT) when their definitions overlap and, sometimes, when the categories frequently occur together. It is generally not necessary to index under both terms; rather, the researcher should be encouraged to use the thesaurus to be guided from one term to the other. Note that related term relationships are not drawn between 655 and 755 terms.

Ex.: STEREOGRAPHS, which are predominantly CARD PHOTOGRAPHS, are linked through the RT notation and are not double indexed by those terms.

4. Basis for cataloging.

4.1. Catalog the material in hand, not what it may be a part of or a detail from.

Ex.: An engraving of a prairie log cabin in a book about the westward expansion of the United States is indexed with: BOOK ILLUSTRATIONS (655), ENGRAVINGS (755), and LOG CABINS (650). It is not indexed by the subject(s) or genre of the larger work. An author/title added entry may be made for the book, if appropriate.

4.2. Institutions often provide photographic, microform, or other quick copy reproductions of pictures as reference substitutes for originals held by the institution. In general, cataloging should be based on the original material even when only the surrogate is in hand. Information about the availability, arrangement, and type of copies is put in the note area of the catalog record (MARC fields 500 and 533), and the physical characteristics of the copy are not indexed in fields 655 and 755. MARC field 037 may be used to record a stock reproduction order number. (Cf. section 5.2.)

5. <u>655 and 755 terms as subjects and in other fields of the</u> catalog record.

5.1. When an image depicts recognizable types of graphic materials, a 655 or 755 term may be used as a topical heading (MARC field 650). The genre or physical type shown in the picture is its subject.

Ex.: A newspaper engraving of a family viewing stereographs is indexed with: PERIODICAL ILLUSTRATIONS (655), WOOD ENGRAVINGS (755), and STEREOGRAPHS (650).

Ex.: A stereograph of a family viewing stereographs is indexed with: STEREOGRAPHS (755) and STEREOGRAPHS (650).

Ex.: An engraved self-portrait of an artist making a selfportrait is indexed with: SELF-PORTRAITS (655), ENGRAVINGS (755), and SELF-PORTRAITS (650).

5.2. When a reproduction is cataloged separately, the reproduction's attributes are indexed in fields 655 and 755, and those of the material it reproduces are indexed as topical subjects in field 650. In other words, the genre and physical characteristic depicted by the reproduction become subjects.

The characteristics of a reproduction are indexed in fields 655 and 755 when an institution chooses to catalog reproductions separately from originals or when an institution has only a reproduction rather than the original item(s).

Ex.: A microfilm that reproduces a selection of pencil drawings from a particular collection is indexed with: MICROFILMS (755), PENCIL WORKS (650), and DRAWINGS (650).

Ex.: An albumen photograph of a lithograph is indexed with: ALBUMEN PHOTOPRINTS (755), REPRODUCTIONS (755), and LITHOGRAPHS (650).

Ex.: A microfilm that reproduces photoprints owned by another institution is indexed with: MICROFILMS (755) and PHOTOPRINTS (650).

5.3. Occasionally, one genre imitates another, and the genre being imitated becomes a subject.

Ex.: A cartoon designed to look like a piece of currency is indexed with: CARTOONS (655) and MONEY (650).

5.4. In anticipation of the need for 655 and 755 terms as subjects, all GMGPC terms have been incorporated in the <u>LC</u> Thesaurus for Graphic Materials: Topical Subjects, which is an authorized source for terms in MARC field 650.

5.5. For consistency in cataloging, 655 and 755 terms are recommended for use in other areas of the record, such as the physical description (MARC field 300) or a note field (MARC field 500). The thesaurus terms may be supplemented in the physical description and notes by uncontrolled vocabulary in order to describe material in greater detail.

6. Subdivisions.

6.1. Any term in GMGPC may be subdivided in order to indicate certain information and to subarrange files. The MARC format provides for three types of subdivisions: general (subfield \neq x), chronological (subfield \neq y), and geographic (subfield \neq z). Although no order for these subfields is specified, the following pattern is recommended both for manual and automated files: [655/755 term]--[general subdivision]--[place subdivision]--[date subdivision]. Subdivisions need not be used with all 655/755 terms (nor at all times), but a consistent practice should be developed.

6.2. It is suggested that two general subdivisions (COLOR and COLORED) be used with physical characteristic terms which do not imply coloring in their names.⁶ The subdivision COLOR refers to material in which color is an inherent part of the original creation. The subdivision COLORED refers to material to which color is applied in a later stage, by hand, stencil, or other method. (A list of media that inherently have color appears in the Classed Display under COLOR ASPECT.)

Ex.: ALBUMEN PHOTOPRINTS--COLORED--1862

Ex.: ENGRAVINGS--COLOR--1800-1899

Ex.: CHROMOLITHOGRAPHS--GERMANY--1890

6.3. Nationality may also be a general subdivision. Use the adjective form for the nationality of the creator of the material being cataloged. (The name of the country is used in the geographic subfield to indicate place of production.) A possible principle to follow is to use the nationality (i.e., general subdivision) when the material cataloged is unpublished and to use the country of production (i.e., geographic subdivision) when the material is published. The examples in 6.3 and 6.4 reflect this practice.

Ex.: TRAVEL SKETCHES--AMERICAN--1900

Ex.: CRAYON DRAWINGS--COLOR-GERMAN-1865

⁶Graphic Materials prescribes that the presence of color be indicated in the physical description statement by the abbreviations "hand col." and "col." which does not distinguish between inherent color and any separate addition of color. For the 755 field subdivisions, the words COLOR and COLORED were selected to clarify the distinction.

6.4. Geographic subdivisions are expressed "indirectly," i.e., with the larger jurisdiction preceding the smaller, as outlined in the Library of Congress <u>Cataloging Service Bulletin</u> 120 (1977), p. 9-11. The geographic place refers to where the material was made, not the place depicted.

Ex.: BROADSIDES--RHODE ISLAND--PROVIDENCE--1820

Ex.: NOVELTY WORKS--ENGLAND--1700-1780

6.5. Each institution must determine its own scheme for chronological subdivision, but the pattern for recording dates outlined in <u>Graphic Materials</u> is recommended. Question marks and the abbreviation "ca." are dropped. Dates expressed as "between [year] and [year]," "before [year]," "after [year]," and dashes are converted to numerical spans. For example, "189-" becomes "1890-1899." The date should be the date the material being cataloged was made, not the date of the subject depicted.

6.6. These same subdivision patterns can also be used in manual files. In addition, some format-oriented genre headings may make useful subdivisions for topical terms to compensate for the lack of postcoordinate searching capability. For example, TOBACCO--ADVERTISEMENTS; SLAVERY--BROADSIDES; PATENT MEDICINES--LABELS; WOMEN--PORTRAITS; MOTION PICTURES--POSTERS.

7. Coding.

In a MARC record, terms from GMGPC are to be entered in subfield \neq a of fields 655 and 755. Terms which do not appear in GMGPC or other thesauri approved for 655 and 755 may not be used in these fields. The Library of Congress has assigned the code "gmgpc" to this thesaurus. The code must be entered in subfield \neq 2 (code for thesaurus).

8. Other MARC formats and 655/755 thesauri.

Terms from GMGPC may be used when cataloging pictorial materials in MARC formats other than Visual Materials.⁷ For example, a catalog record for an illustrated book may include such terms in field 755 as PHOTOGRAVURES or WOODBURYTYPES; or a catalog record for a manuscript collection may include such terms as PORTRAITS in field 655 and PHOTOPRINTS in field 755. Likewise, terms from other authorized 655/755 thesauri may be

[/]GMGPC has been approved for rare book and special materials cataloging by the Standards Committee of the Rare Books and Manuscripts Section, Association of College and Research Libraries, American Library Association.

used in records for graphic collections containing non-pictorial material. The appropriate thesaurus source code should be indicated for each heading.

VI. EXAMPLES

Example 1. MARC coding with subfields.

245 00 ≠aAlbum pintoresco de la Isla de Cuba≠h[qraphic] 260 ØØ ≠a[Berlin?] :≠bB. May y Ca.,≠cl858? 300 $\beta\beta \neq al v.$ (28 chromolithographs, 2 maps) ; $\neq c26 \times 36$ cm. 500 bb ≠aTitle from cover. 650 -7 ≠aFishing≠y1858.≠21ctqm 651 -0 ≠aCuba. 655 -7 \u2224aCaricatures \u2222Zermany \u2224y1858. \u22222qmqpc 655 -7 \u2224aLandscape prints \u2222Zermany \u2224y1858. \u22222qmqpc 655 -7 \approx aMaps \approx zGermany \approx 1858. \approx 2qmqpc 710 21 ≠aB. Physical description and note. 300 l print ; 22 x 45 cm. 500 Etching with drypoint, scraping, and burnishing, on red handmade paper. 755 Etchings--Italian--1967.

Example 5. Physical description and note for mixed media. 300 1 drawing and painting ; 12 x 15 cm. 500 Pen, pencil, ink, and graphite with blue and green acrylic paint. 655 Travel sketches--French--1912. 755 Mixed media--French--1912. Example 6. Reproduction. 100 Stuart, Gilbert, 1755-1828 245 George Washington / M. Johnston 260 [ca. 1850] 300 l photograph : daguerreotype, hand col. ; 8.5 x 6.5 cm. 500 Photograph of painting, 1795. 600 Washington, George, 1732-1799. 650 Portrait paintings--1795. 655 Portraits--1850. 700 Johnston, Mary, photographer. 755 Daguerreotypes--Colored--Pennsylvania--1850.

-

VII. REVISIONS

New terms, corrections, and alterations to terms, scope notes, and references are solicited. Any new term proposed should be accompanied by notes and references. Correspondence regarding GMGPC should be addressed to:

Picture Cataloging Specialist Prints and Photographs Division Library of Congress Washington, D.C. 20540

BIBLIOGRAPHY

Many reference sources were consulted to select terms and compile the definitions. The selection listed here is limited to those which cover several processes or common formats. Most have illustrations and also contain additional citations which would be useful if more extensive study of particular material is desired.

I. ALPHABETICAL DISPLAY

A la poupée prints [755] PN Color prints made by simultaneously inking separate areas of the same plate or block with different colors, before printing. UF Poupée prints BT Prints RT Intaglio prints > Relief prints > A trois crayons drawings [755] PN Chalk drawings in three colors, usually red, white, and black. UF Three chalk drawings Trois crayons drawings BT Chalk drawings Abstract drawings [655] BT Abstract works Drawings Abstract paintings [655] BT Abstract works Paintings Abstract photographs [655] BT Abstract works Photographs Abstract prints [655] BT Abstract works Prints Abstract works [655] PN Images in which the depiction of real objects has been subordinated or entirely discarded; especially (but not necessarily) non-representational images, stressing formal relationships of line, color, and shape. NT Abstract drawings Abstract paintings Abstract photographs Abstract prints Acrylic paintings [755] BT Polymer paintings PN = Public note; CN = Cataloger's note; UF = Used for term;

BT = Broader term; NT = Narrower term; RT = Related term; > = Terms which have their own narrower terms

Advertisements [655]

- PN Public notices of the availability of goods or services through purchase or other means.
- CN Also index under BROADSIDES, HANDBILLS, POSTERS, or other appropriate form.
- BT Ephemera
- NT Advertising cards > Advertising mail Display cards
- RT Fashion photographs Fashion prints Premiums

Advertising cards [655]

- PN Cards issued to be given away by merchants, sales agents, or others to advertise and promote the sale of their goods or services. May also have been enclosed with products, such as bread, cigarettes, and coffee, as a premium. Usually, cards bear seller or product name and a pictorial representation of the service or product. Picture may also be unrelated, such as a colorful bird scene on a local stationer's card.
- UF Insert cards Trade cards Tradecards Trading cards
- BT Advertisements Cards
- NT Cigarette cards Ship cards Stock cards
- RT Business cards Collecting cards Sports cards

Advertising mail [655]

- PN Advertisements distributed or intended for distribution by mail.
- UF Direct-mail advertising Junk mail
- BT Advertisements
- RT Commercial catalogs

Aerial photographs [755]

- PN Photographs taken from an air-borne vehicle, such as an airplane, balloon, kite, or satellite; from a camera strapped to a bird; or by a person, such as a parachutist, in flight.
- UF Balloon views
- BT Photographs

Agfacolor phototransparencies USE Dye coupler phototransparencies

Airbrush works [755]

RT Paintings > Photographs >

Albertypes

USE Collotypes

Album cards

USE Collecting cards

Album covers

USE Record jackets

Albumen photoprints [755]

- PN Predominant paper print process in the 1800s; popular 1850s-1890s.
- BT Photoprints
- RT Crystoleum photographs

Albumen phototransparencies [755]

- PN Typically, glass lantern slides or stereographs; introduced 1849; largely replaced by collodion phototransparencies.
- UF Hyalotypes
- BT Glass phototransparencies

Albums [655]

- PN Unpublished, bound, or loose-leaf sets of pages assembled together either before or after material was affixed to them or images were made on them. Also, published albums with pages marked for the addition of stickers, collecting cards, baby keepsakes, or other keepsakes. Albums which have lost their original covers are included, but not albums assembled by the repository.
- NT Photograph albums > Presentation albums Scrapbooks Sketchbooks Souvenir albums
- RT Sample books

Allegorical drawings [655]

BT Allegories Drawings

> PN = Public note; CN = Cataloger's note; UF = Used for term; BT = Broader term; NT = Narrower term; RT = Related term; > = Terms which have their own narrower terms

Allegorical paintings [655] BT Allegories Paintings

- Allegorical photographs [655] BT Allegories
 - Photographs
- Allegorical prints [655] BT Allegories Prints

Allegories [655]

- PN Representations of truths or generalizations about human existence by means of symbolic images; often of classical derivation.
- NT Allegorical drawings Allegorical paintings Allegorical photographs Allegorical prints
- RT Allusions

Allusions [655]

- PN Representations of or references to one work in another work. Does not include reproductions or works made "after" other works. Examples include a poster in which the Mona Lisa is recognizable but altered to fit the poster's message.
- RT Allegories >

Amateur works [655]

- PN Works created by people who are not full-time or professional practitioners in the medium or genre; often made for pleasure rather than money; does not refer to image quality. Examples include photographs by non-professional camera club members.
- RT Snapshots Student works

Ambrotypes [755]

- PN Direct-image photographs; the chemically reduced collodion glass negative packaged against a dark background appears as a positive. Commonly in a case; popular mid-1850s to mid-1860s.
- CN Used in a note under PHOTOGRAPHS.
- UF Cased photographs
 - Collodion positive photographs
- BT Photographs

4

Anaglyphs [755]

- PN Photomechanical images in two contrasting colors, such as red and green. Printed either as a pair of images or as one image superimposed on the other but slightly out of registry. When viewed through a pair of lenses, each in the appropriate different color, a three-dimensional effect is created. Introduced in 1891; popular during the 1920s.
- BT Novelty works Photomechanical prints Stereographs

Anamorphic images [655]

- PN Images produced by a distorting optical system or other method that renders an image unrecognizable unless viewed by the proper restoring device. Popular for prints and drawings in the 1600s and 1700s and for photographs in the 1800s. Images are often recorded as they appear in a convex or concave cylindrical mirror.
- BT Novelty works

Animation cels [655]

- PN Images on celluloid or polyester sheets, which are used in combination with similar animation cels to create an animated sequence for movie, videotape, and other motion picture productions; usually drawings or paintings.
- UF Cartoon cels Cels, Animation

Announcements [655]

- PN Small notices of special occasions, such as weddings.
- BT Ephemera
- RT Broadsides > Invitations

Aquatints [755]

- BT Intaglio prints
- NT Sugar-lift aquatints
- RT Etchings >

PN = Public note; CN = Cataloger's note; UF = Used for term; BT = Broader term; NT = Narrower term; RT = Related term; > = Terms which have their own narrower terms

Architectural drawings [655]

- PN Graphic delineations made for the design and construction (or documentation of design and construction) of sites, structures, buildings, details, fixtures, furnishings, and decorations, as well as other objects designed by an architect or arcnitectural office. In the broadest sense, any drawing by an architect or firm relating to an architect's work.
- CN Also index under terms which express the type of projection or purpose, such as ELEVATIONS or COMPETITION DRAWINGS. These terms are listed under PROJECTIONS and DESIGNS. Used in a note under ENGINEERING DRAWINGS, LAND-SCAPE ARCHITECTURE DRAWINGS, and NAVAL ARCHITECTURE DRAWINGS.
- UF Drawings, Architectural
- BT Design drawings

Aristotypes

USE Collodion printing-out paper photoprints Silver gelatin photoprints >

Art reproductions [755]

- PN Commercially published, mechanically printed copies of individual paintings, prints, drawings, and other twodimensional works of art.
- BT Reproductions

Artists' proofs [755]

- PN Prints which are accepted for an edition but are unnumbered or numbered separately from the edition and reserved for the artist's use.
- BT Prints Proofs

Artists' signatures [755]

- PN Signatures of artists, photographers, painters, or printmakers on their own works.
- BT Autographs

Artotypes

USE Collotypes

As-built drawings [655]

- PN Final set of working drawings incorporating (through revisions or annotations) any changes of dimensions, materials, form, and method of construction encountered in the completion of the structure or site. Difficult to identify unless marked as such.
- UF Drawings, As-built
- BT Working drawings

Auction catalogs [655] BT Catalogs Autochromes USE Screen color glass phototransparencies [755] Autographs PN Names of people written in their own hand; stamped or printed signatures are not included. BT Inscriptions NT Artists' signatures Autotypes USE Carbon photoprints Avant des lettres prints USE Proofs before letters Awards of merit USE Rewards of merit Axonometric projections [655] PN Parallel orthographic projections in which the object or subject is tilted in relation to the picture plane so that three faces and axes are visible although not in true shape. BT Projections NT Isometric projections [655] Badges PN Devices indicating support of a cause, attitudes, achievements, or membership or participation in a society or group. May be printed, photographic, plastic, metal, woven cloth or other fabric; usually intended to be worn on the person. UF Button badges Ribbon badges BT Ephemera RT Memorabilia [655] Bags PN Sacks, usually rectangular shaped and made of paper, plastic, or cloth, such as burlap or canvas; printed with manufacturer's name or advertisement. UF Sacks BT Packages

PN = Public note; CN = Cataloger's note; UF = Used for term; BT = Broader term; NT = Narrower term; RT = Related term; > = Terms which have their own narrower terms Balloon views USE Aerial pnotographs Bird's-eye views > Panoramic views >

- Ballots [655]
 - PN Sheets of paper, cards, or other devices used to cast a vote or announce a slate of candidates.
 - UF Election tickets
 - BT Ephemera

Bank note vignettes [655]

- PN Engraved decorations primarily designed for use on bank notes or other currency but also commonly used on stock certificates and other securities. They may be pictorial or ornamental images and date from the 1790s to the present.
- UF Security engravings
- BT Decorations
- RT Certificates > Money >

Bank notes [655]

PN Promissory notes issued by banks, payable to bearer on demand without interest, and circulating as money.

BT Money

Banners [655]

- PN Sheets of cloth, plastic, or paper intended for hanging or other public display. Examples include banners strung across streets announcing festivals and banners carried in parades.
- BT Signs

Banquet camera photographs [755]

- PN Photographs made from a fixed wide-angle-lens camera capable of producing a sharp image of great depth. Usually photographs of large groups of people. One camera, marketed 1913-1926, produced prints of 7 x 17 in. (18 x 43 cm.) and 12 x 20 in. (30 x 51 cm.).
- BT Photographs
- Baptismal certificates [655] BT Certificates

Bellmen's verses USE Carriers' addresses

Billboard posters [655]

- PN Large multi-sheet posters; intended for posting on billboards, fences, or similar surfaces.
- BT Posters

Billheads [655]

- PN Documents for itemized accounts of the separate cost of goods sold or shipped, services performed, or work done; pictorial or typographically decorated headings.
- BT Stationery
- Bills of fare

USE Menus

Bird's-eye view prints [655]

- PN Bird's-eye views of cities and towns that are lithographs, engravings, or other types of prints including photomechanical ones. Popular in the United States 1870-1910s, but also made earlier.
- CN Used in a note under BIRD'S-EYE VIEWS.
- UF Panoramic maps
- BT Bird's-eye views Prints
- RT Cityscape prints

Bird's-eye views [655]

- PN Graphic representations of scenes portrayed as if viewed from above at an oblique angle. If of a city or town, not generally drawn strictly to scale but showing street patterns, individual buildings, and major landscape features in perspective.
- CN For the class of engravings, lithographs, and photomechanical prints commonly known as bird's-eye views, use BIRD'S-EYE VIEW PRINTS. Do not use for photographs.
- UF Balloon views Views, Bird's-eye
- NT Bird's-eye view prints
- RT Maps > Panoramic views > Projections >
- Birth certificates [655] BT Certificates
- Birthday cards [655] BT Greeting cards

Black-and-white photoprints USE Photoprints >

Black light works USE Luminous works

Black line prints USE Diazo photoprints Blind embossed prints USE Inkless intaglio prints Blind stamps [755] PN Symbols or other devices embossed or impressed without ink onto paper or other material. Often used to identify the creator, printer, publisher, or owner. UF Stamps, Blind BT Marks RT Embossed works > Block prints USE Relief prints > Blocks, Printing USE Printing blocks > Blue line prints USE Diazo photoprints Blueprints [755] PN Cyanotypes that reproduce designs as white lines against a blue background. Introduced in the United States ca. 1876; predominant method for reproducing architectural and engineering drawings by the 1950s; largely discontinued by 1980. BT Cyanotypes Reproductions Bonds (Financial records) [655] PN Interest-bearing certificates indicating public or private indebtedness. BT Certificates Book covers [655] PN Covers forming the binding or outer enclosure of a hardback or paperback book. Covers may be detached or still attached to the publication.

BT Packages

Book illustrations [655]

- PN Illustrations in books or pamphlets, whether photographs, photomechanical prints, or other media; whether still part of or detached from the volume. Also, drawings, photographs, prints, and other pictures made to be reproduced as illustrations, whether published in the same or another medium, and whether or not they were ever published.
- UF Pamphlet illustrations
- BT Illustrations

Book jackets [655]

- PN Detachable flexible covers, usually paper, designed for or published with a book.
- UF Dust jackets
- BT Packages
- Book plates

USE Bookplates

Booklets

USE Leaflets Pamphlets Souvenir viewbooks

Bookmarks [655]

- PN Paper, cardboard, cloth, or other markers used to hold a place in a book.
- BT Ephemera

Bookplates [655]

- PN Book owners' identification labels; usually intended for pasting inside a book.
- UF Book plates Ex libris
- DW Labele
- BT Labels
- RT Ownership marks

Books [755]

- PN Published non-periodical volumes in bound codex form, usually with 49 or more pages. Search also under terms beginning with BOOK.
- RT Leaflets Pamphlets

Boudoir card photographs [755]

- PN Card photographs; mounts measure appoximately 8.5 x 5.5 in. (22 x 14 cm.). Introduced in the United States ca. 1890.
- BT Card photographs

Broadsides [655]

- PN Single-sheet public notices that are usually printed on only one side; often chiefly text and meant to be read unfolded. They provide information, news commentary, proclamation, or other announcement or advertisement. Primarily posted but also distributed by hand. Larger than handbills and advertising cards; usually less pictorial than posters; more extensive text than signs.
- CN Used in a note under ADVERTISEMENTS.
- UF News sheets
- BT Ephemera
- NT Handbills
- RT Announcements Carriers' addresses Playbills Signs >

Brochures

USE Leaflets

- Bromide photoprints
 - USE Silver gelatin photoprints >

Bromoil photoprints [755]

- PN Bromide photoprints which are developed and then bleached and colored. Oil base pigment(s) is applied with a soft brush or a brayer, usually in repeated applications. Introduced in 1907.
- BT Photoprints
- Brownprints
 - USE Diazo photoprints Kallitypes >
- Brush works [755] RT Paintings >
 - Wash drawings

Business cards [655]

- PN Small cards that bear name and often address of a business or other organization and its representative. Usually lacks illustration except for a logo or emblem. More of an information card than an advertisement.
- UF Trade cards Tradecards
- BT Cards
- RT Advertising cards > Visiting cards
- Button badges

USE Badges

Cabinet card photographs [755]

PN Card photographs; mounts measure approximately 6.5 x 4.5 in. (17 x 11 cm.). Introduced in the United States in 1866; popular until ca. 1900.

BT Card photographs

CAD drawings

USE Computer-aided designs

Calendars. [655]

PN Tabular registers of days according to a system, usually covering one year and referring the days of each month to the days of the week.

BT Charts

NT Perpetual calendars Religious calendars

Calligrams

USE Letter pictures

Calligraphy [655]

PN Elegant handwriting or penmanship. RT Letter pictures

Calling cards USE Visiting cards

Callitypes USE Kallitypes

Calotypes [755]

- PN In the strictest sense, paper photonegatives made by a process patented by Fox Talbot in 1841. Commonly, and here, also negatives made by the process as later modified. More popular in France and England than in the United States; used through the 1860s.
- UF Talbotypes Waxed paper photonegatives
- BT Paper photonegatives

Camera lucida works [755]

- PN Drawings (and paintings or other works made from them) produced by tracing the image of an object or scene as it appears when projected through the prism of a camera lucida. The device, which aids accuracy, enlargement, and reduction, was not widely used until the early 1800s; replaced the camera obscura.
- RT Tracings

Camera obscura works [755]

- PN Drawings (and paintings or other works made from them) produced by tracing the image of an object or scene as it appears when projected through the aperture of a camera obscura which is used to aid accuracy. This device, available by the 1500s, may be a portable box with lens and mirror, or a room; supplanted by the camera lucida.
- RT Tracings

Cancelled plate prints [755] BT Restrikes

Carbon photoprints [755]

- PN Photoprints made by a relatively permanent, non-silver process involving bichromated gelatin. Popular ca. 1870-1900s; more common in Europe than United States; often used to reproduce art works. Typically carbon black, but a wide range of other pigments may also be used.
- UF Autotypes Chromotypes Lambertypes
- BT Photoprints
- NT Carbro photoprints >

Carbon phototransparencies [755]

- PN Phototransparencies made with a carbon process on glass.
- BT Glass phototransparencies

Carbro photoprints [755]

- PN Photoprints made by pressing a specially sensitized carbon tissue against a wet bromide print and subsequent development of the tissue. Introduced in 1905 as Ozobrome; popular 1920s-1930s as a way to make carbon prints larger than the original negative since the bromide print intermediary could be an enlargement of the negative.
- UF Ozobrome photoprints
- BT Carbon photoprints
- NT Tricolor carbro photoprints

Card photograph albums [655]

- PN Albums made to hold card photographs.
- UF Cartes de visite albums
- BT Photograph albums

Card photographs [755]

- PN Paper photoprints made by a variety of processes on commercially produced cardboard mounts of standard sizes (with some variation). Introduced in the 1850s. This term includes photonegatives and unmounted photoprints when it is clear that they were intended for such standard mounts. Often portraits.
- CN As desired, also index under the type of photographic process.
- BT Photographs
- NT Boudoir card photographs Cabinet card photographs Cartes de visite Imperial card photographs Kodak card photographs Panel card photographs Promenade card photographs Victoria card photographs
- RT Photonegatives > Photoprints > Stereographs >

Cards [655]

- PN Pieces of thin paperboard, stiff paper, or other material, which are flat, usually small and rectangular, and designed to convey messages or other information.
- BT Ephemera

Caricatures [655]

- PN Cartoons which portray in a critical or facetious way a real individual or group, or a figure representing a social, political, ethnic, or racial type. The effect is usually achieved through distortion or exaggeration of the features or form.
- BT Cartoons
- RT Portraits >

Carriers' addresses [655]

- PN Verses in broadside or pamphlet format presented at the start of a new year by newspaper carriers (and sometimes by other trades people) to request a gratuity.
- UF Bellmen's verses Newscarriers' addresses Newsmen's presents
- BT Ephemera
- RT Broadsides > New Year cards

Cartes de visite [755]

- PN Card photographs; mounts measure approximately 4 x 2.5 in. (10 x 6 cm.). Introduced in the United States in 1859; made into the 1900s.
- BT Card photographs
- Cartes de visite albums USE Card photograph albums

Cartoon cels

USE Animation cels

[655] Cartoon patterns PN Graphic delineations, often drawings, prepared as same size patterns for, among other things, tapestries, murals, paintings, and stained glass. BT Pattern sheets Cartoon strips [655] PN Sequences of cartoons with a story line laid out in a series of pictorial panels across a page or sheet and concerning a continuous character or set of characters. UF Comic strips BT Cartoons NT Comic books Cartoons [655] PN Humorous, satirical, or ridiculing images executed in a broad or abbreviated manner. UF Comic pictures NT Caricatures Cartoon strips > Comic cards Editorial cartoons Satires RT Humorous pictures Cartouches [655] PN Graphic delineations that are ornamental frames intended to contain an inscription, such as a map title, or a decoration, such as a coat of arms. BT Decorations RT Maps > Title pages > Cased photographs USE Ambrotypes Daguerreotypes Photograph cases Casein paintings [755] BT Paintings

Catalogs [655]

- CN In Genre Terms ... Rare Book, this term is spelled "catalogues."
- UF Catalogues
- NT Auction catalogs Commercial catalogs Exhibition catalogs
- RT Ephemera > Price lists Sample books

Catalogues

USE Catalogs >

Cellocuts [755]

- PN Prints made from blocks whose surface is built up with liquid plastics. May be printed in intaglio or relief. They look much like linocuts.
- BT Prints
- RT Intaglio prints > Relief prints >

Cellulose diacetate photonegatives [755]

- PN Difficult to distinguish from cellulose triacetate negatives unless they already show deterioration, typically differential shrinkage and reticulation. Marketed 1926-1956.
- UF Diacetate photonegatives
- BT Film photonegatives

Cellulose nitrate photonegatives [755]

- PN In use 1887-ca. 1950; flammable.
- UF Nitrate photonegatives
- Nitrocellulose photonegatives
- BT Film photonegatives

Cellulose triacetate photonegatives [755]

- PN Introduced in 1947. Difficult to distinguish from undeteriorated cellulose diacetate negatives.
- UF Triacetate photonegatives
- BT Film photonegatives

Cels, Animation

USE Animation cels

Censored works [655]

PN Materials altered or prohibited because considered unsuitable for the general public. Ceramic photographs [755] PN Photographs produced by any of a variety of processes on a porcelain, earthenware, or other ceramic support. UF Photoceramics Porcelain photographs BT Photoprints RT Opalotypes Certificates [655] PN Documents containing certified statements of, for example, ownership, membership, fulfilled requirements, or legal status. BT Ephemera NT Baptismal certificates Birth certificates Bonds (Financial records) Death certificates Diplomas Insurance certificates Marriage certificates Membership certificates Stock certificates RT Bank note vignettes Fraktur Rewards of merit Chalk drawings [755] BT Drawings NT A trois crayons drawings Charcoal drawings [755] BT Drawings Charts [655] PN Delineations of information in tabular form. BT Diagrams NT Calendars > Genealogical tables Schedules Schedules (Contract documents)

Chiaroscuro woodcuts [755]

- PN Woodcuts printed from two or more blocks, one of which is usually cut to print the design in black and the others to print neutral or background colors to show differences in value. The paper itself is usually reserved to provide the lightest tone in the image. Technique developed in Europe in the 1500s; often used to reproduce drawings and paintings.
- BT Woodcuts
- RT Reproductive prints

Chine collé prints [755]

- PN Prints made by laying down a thin sheet of paper on a heavier backing. The thin sheet adheres permanently to the backing sheet during printing. Lithographic or in-taglio method.
- BT Prints
- RT Intaglio prints > Lithographs >

Chloride photoprints > USE Photoprints >

Cityscapes [655] PN General or broad views of cities and towns or sections of them. Usually made from an elevated or distant vantage point, such as a view from a roof or a view of a skyline, but not a ground level view of, for example, a row of buildings seen only at street level. UF Topographic views
Townscapes
NT Cityscape drawings Cityscape paintings Cityscape photographs Cityscape prints
RT Panoramic views >

Clichés-verre [755]

PN Salted paper, albumen, silver gelatin, or other types of photoprints made by drawing lines through or scraping away parts of an exposed and processed light-sensitive emulsion or other opaque ground coated on a glass plate or plastic film. Light passes through the lines to create an image on photographic paper exposed beneath the film or plate. Alternatively, inks can be applied to a transparent matrix in varying thicknesses to alter the amount of light reaching the sensitized paper. May resemble drawings or prints until examined closely.

Clipper ship cards USE Ship cards

- Clippings [755]
 - PN Illustrations, pages, articles, or columns of text removed from books, newspapers, or periodicals, or other publications.
 - UF Newspaper clippings Press clippings
 - NT Tear sheets
- Cloth labels

USE Textile labels

Cloth photographs [755]

- PN Photographs produced by any of a variety of processes on cotton, silk, or other cloth support.
- UF Collodion positive photographs
- BT Photoprints
- Cloth prints [755]
 - PN Prints produced by any of a variety of processes on cotton, silk, or other cloth support. This term does not include printed textile design fabrics.
 BT Prints

Collages [755]

PN Constructions in which bits of relatively flat materials, such as newspaper or cloth, are fixed to a support in relationships for their symbolic or suggestive effect.

- BT Constructions
- RT Photomontages

Collagraphs [755]

- PN Prints made from blocks or plates on which the image has been built up with a collage of various materials and objects. May be printed in intaglio or relief.
- UF Collographs
- BT Prints
- RT Intaglio prints >
 - Relief prints >

Collecting cards [655]

- PN Cards issued to be sold singly, in strips, or in other sets for collecting and trading. Not available as premiums; not intended to be advertisements. Examples include cards illustrating the Ten Commandments, movie stars, or wild flowers.
- UF Album cards Trade cards Tradecards Trading cards
- BT Cards
- RT Advertising cards > Comic cards Sports cards
- Collectors' marks [755]
 - BT Ownership marks

Collodio-chloride photoprints USE Collodion printing-out paper photoprints

Collodion dry plate photonegatives [755]

- PN Efforts to make dry collodion plates began in the 1850s with honey, tannin, and other processes. More practical formulas introduced in the 1860s still required very long exposure times and were little used. Hand-coated emulsions make these negatives look like wet plates.
- CN Unless a photographer's or other notes identify them, these dry plates are so difficult to distinguish from collodion WET PLATE PHOTONEGATIVES that most will be indexed as wet plates.
- UF Collodion photonegatives
- BT Dry plate photonegatives

Collodion photonegatives

USE Collodion dry plate photonegatives Wet plate photonegatives

Collodion phototransparencies [755]

- PN Typically, glass stereographs or lantern slides; used 1850s-1890s.
- UF Collodion positive photographs
- BT Glass phototransparencies
- Collodion positive photographs
 - USE Ambrotypes

Cloth photographs Collodion phototransparencies Leather photographs Tintypes

Collodion printing-out paper photoprints [755]

- PN Available in the 1860s but not popular until late 1880s; chief commercial portrait medium 1895-1910. Glossy version has warm image hues while the matte version, which dominated from the mid-1890s, has near-neutral image hues. Usually toned with gold or platinum so that images show little or no fading. They do not show silver mirroring.
- CN Glossy collodion prints are virtually indistinguishable from SILVER GELATIN PRINTING-OUT PAPER PHOTOPRINTS by visual inspection. If in doubt, use PHOTOPRINTS. Used in a note under SILVER GELATIN PRINTING-OUT PAPER PHOTO-PRINTS.
- UF Aristotypes Collodio-chloride photoprints
- BT Photoprints

Collographs

USE Collagraphs

Collotypes [755]

- PN Photomechanical prints introduced commercially in the 1860s; commonly used in book illustration; can be difficult to distinguish from actual photographs.
- CN Used in a note under PHOTOPRINTS.
- UF Albertypes Artotypes Heliotypes
- BT Photomechanical prints

Contact sheets [755]

- PN Proof sheets containing contact prints from more than one photonegative; often used to select images for individual printing.
- BT Photoprints Proofs

Conté crayon drawings

USE Crayon drawings

Contract drawings [655]

- PN Graphic delineations which constitute part of a legal contract between a client and craftsman, builder, architect, engineer, contractor, or other service provider. Signed or accepted by one or more parties, or otherwise identified as part of a contract agreement or set of specifications. Used especially from the mid- to late-1800s.
- UF Drawings, Contract
- BT Design drawings

Copies

USE Reproductions >

Copy art [755]

- PN Images made with copy machines, such as Xerox machines, that are original works rather than reproductions of other documents. Examples include multiple copy, personal use invitations as well as artist's works.
- BT Photocopies

Costume design drawings [655]

- PN Graphic delineations made for the design and production (or documentation of design and production) of costumes for theatrical and other performing arts productions and for special events, such as costume balls or Halloween.
- BT Design drawings
- RT Fashion design drawings

Costume prints [655]

- PN Prints made for the study or documentation of clothing, such as national dress or military uniforms; often in series.
- BT Prints
- RT Fashion prints Genre prints

Counterfeits

USE Forgeries

Counterproofs [755]

- PN In printmaking, impressions taken from a print or drawing by passing it through a press against a sheet of damp paper. The image appears in reverse.
 BT Prints
 - Proofs

Courtroom illustrations [655]

- PN Graphic delineations of courtroom proceedings made during the proceedings intended to illustrate newspaper, television, or other trial accounts.
- BT Illustrations

Crayon drawings [755]

- UF Conté crayon drawings
- BT Drawings

Crayon manner prints [755]

- PN Etchings, engravings, or drypoints in which dots placed close together, usually by a roulette wheel, create lines which approximate crayon strokes. In vogue in France in the 1700s; chiefly used to reproduce drawings.
- BT Intaglio prints
- RT Reproductive prints

Crayon photoprints [755]

PN Chiefly portraits from the 1860s-1920s made by drawing extensively in charcoal or pastel over a faint photoprint. The photo may, in fact, be largely hidden. May be printing-out or developing-out paper, but the enlargements, often life size, are among the few developing-out prints made in the 1800s.

- BT Photoprints >
- RT Drawings >

[Creator attribute

See this term in the Classed Display.]

Cries [655]

PN Genre works featuring peddlers hawking their wares with, usually, the text of the rhyme they cried. Introduced by the 1500s; prints, paintings, or drawings.

- UF Street cries
- BT Genre works

Crime photographs USE Legal photographs

Crystoleum photographs [755]

- PN Photoprints, usually albumen, the face of which is adhered to glass. The print is made transparent (by wax or oil or by scraping) and hand colored, then backed with another glass (which may also be painted to add color to the photo) and a card. They give the appearance of a painting on glass.
- UF Chromo-photographs
- BT Photoprints
- RT Albumen photoprints

Currency

USE Money >

Cut paper works [755]

- PN Images produced entirely or partially by cutting an outline shape or interior areas to form the design. Examples include hollow cut silhouettes and cobweb valentines.
- UF Papercuts

Scherenschnitte Scissorcraft

Cyanotypes [755] PN Blue photoprints employing light-sensitive iron salts, most commonly on paper; introduced in the 1840s but not in general use until after 1880; often used as proofs. BT Monochromatic works Photoprints NT Blueprints RT Proofs > [755] Daquerreotypes PN Direct-image photographs on silver-coated copper; introduced in 1839 and in general use until ca. 1860; distinctive mirror-like surface; commonly in a case. CN Used in a note under PHOTOGRAPHS and STEREOGRAPHS. UF Cased photographs BT Photographs Dance cards [655] PN Cards on which names of dances and dance partners may be written. BT Cards Dealers' marks [755] PN Marks of dealers, auction houses, or other sellers. BT Marks Death certificates [655] BT Certificates Decals [755] PN Images made on paper specially treated so the image can be transferred to another surface, usually by wetting the paper, laying it face down against the other surface, then stripping away the backing sheet. BT Stickers RT Transfer sheets Decorations [655] PN Images that ornament a text or picture but do not relate specifically to its meaning. UF Ornaments NT Bank note vignettes Cartouches Scraps RT Illuminations > Illustrations > Title pages >

Design drawings [655]

- PN Graphic delineations in any medium prepared to plan, direct, or document the design and production of a wide range of works in various trades, professions, and artistic pursuits. May be sketches, diagrams, mechanical drawings, or other formats.
- CN Used in a note under ARCHITECTURAL DRAWINGS.
- UF Drawings, Design Production drawings
- NT Architectural drawings Competition drawings Contract drawings Costume design drawings Electrical systems drawings Engineering drawings Fashion design drawings Industrial design drawings Interior design drawings Landscape architecture drawings Measured drawings Mechanical drawings Mechanical systems drawings Naval architecture drawings Patent drawings Pattern books Pattern sheets > Planning drawings Presentation drawings Proposed works Renderings Set design drawings Site plans Structural systems drawings > Studies Textile design drawings Working drawings >

RT Details

Diagrams > Projections > Sketches > Specifications >

Details [655]

- PN Small specific parts of a painting, design, or other composition; usually at an enlarged scale showing more information than in the entire work. Often done in preparation for a larger finished work, as a subject for study or training, or as a guide for workmen or artisans. This term includes photoprints made from a portion of a negative.
- RT Design drawings > Studies

Detective camera photographs [755]

- PN Photographs made by cameras designed to take pictures inconspicuously. The cameras often have special shapes for concealment under a vest or elsewhere or are disguised as other objects, such as revolvers, hats, books, watches, or binoculars.
- UF Concealed camera photographs Vest camera photographs
- BT Photographs

Diacetate photonegatives

USE Cellulose diacetate photonegatives

Diagrams [655]

- PN Delineations whose principal purpose is to explain rather than represent pictorially. May show arrangements, such as sequence or hierarchy, and relationships, such as partwhole or major-minor. May provide directions or schematic outline for construction, assembly, repair, or operation, as for electrical circuits or traffic flow.
- UF Production drawings Technical drawings
- NT Charts >
- RT Design drawings >

Diazo photoprints [755]

- PN Photoprints made with material containing diazonium compounds, sensitive to blue and ultraviolet light; commonly developed with ammonia. Introduced in 1890; chiefly for reproducing high contrast line drawings, such as architectural drawings, on paper, cloth, or other fabric. Most commonly blue or black lines on a white background, but lines may be in many other colors.

Dye coupler photonegatives [755]

- PN Trade names include Kodacolor (launched in 1942 as the first commercial color negative process in the United States), Ektacolor (1947), and Fujicolor. A chromogenic development process.
- UF Ektacolor photonegatives Fujicolor photonegatives Kodacolor photonegatives
- BT Film photonegatives

Dye coupler photoprints [755]

- PN Most color photoprints (except instant camera) made since 1941 are included. Commonly referred to as Type C if made from a negative and Type R if made from a transparency. A chromogenic development process.
- UF Type C photoprints
 - Type R photoprints
- BT Photoprints

Dye coupler phototransparencies [755]

- PN Trade names include Kodachrome and Agfacolor (both introduced in 1936), Ektachrome (introduced in the 1940s), and Fujichrome. A chromogenic development process.
- UF Agfacolor phototransparencies Ektachrome phototransparencies Fujichrome phototransparencies Kodachrome phototransparencies
- BT Film phototransparencies

Dye destruction photoprints [755]

- PN Color photoprints made under various trade names including Utocolor in the early 1900s and Gasparcolor in the 1930s. Cibachrome, introduced in 1963, is the modern representative of this process. Valued in part for the relative stability of the color dyes.
- UF Cibachrome photoprints Silver dye bleach photoprints
- BT Photoprints

Dye diffusion transfer photoprints [755]

- PN Color instant camera photoprints. Polaroid was introduced commercially in 1965; Kodak followed in 1976, and Fuji in 1981. Commonly 3.12 x 3.12 in. (8 x 8 cm.).
- UF Kodak instant color photoprints Polaroid instant color photoprints
- BT Instant camera photographs Photoprints

Dye transfer photoprints [755]

- PN Color photoprints made by the imbibition process and a variety of techniques which begin with three color separation negatives, then dyed matrices, and a final print. Among the many trade names are Pinatype (introduced in 1903) and Eastman Wash-off Relief (1935-1946). Kodak Dye Transfer process (introduced in 1946) is still in use.
- UF Imbibition process photoprints Pinatypes
- BT Photoprints

 - BT Portraits
 - NT Formation photographs

Gum bichromate photoprints [755]

- PN Non-silver photoprints made by coating white or color paper with a light-sensitive gum arabic solution and any desired pigment color. The print hardens selectively during exposure to a negative, and the darker areas retain the color of the pigmented solution in proportion to the degree of hardening that has occurred. Additional coatings and exposures are possible. Developed in the 1850s but little used until the 1890s.
- UF Gum photoprints
- BT Photoprints
- Gum photoprints

USE Gum bichromate photoprints

Halftone photomechanical prints [755]

- PN Prints distinguished by patterns of dots or circular lines, or other indication of the screen interposed between the original image and the camera. Usually used to reproduce continuous tone originals, such as photographs, in books or newspapers or as postcards or other publications. First commercially available in the 1880s.
- BT Photomechanical prints

Halftone photonegatives [755]

- PN Photonegatives in which the image appears as exposed through a line screen as a pattern of dots or squares of varying sizes. Used to make printing plates for halftone photomechanical prints.
- BT Film photonegatives
- RT Photomechanical prints >

Handbills [655]

- PN Small single sheet notices, usually unfolded; may be printed on both sides; intended for wide distribution by hand, mailing, or other means.
- CN Also index under POSTERS when a sheet is partly text, partly pictorial and intended for both hand distribution and posting. Used in a note under ADVERTISEMENTS. In Genre Terms ... Rare Books, BROADSIDES is used instead of HANDBILLS.
- UF Circulars Fliers
- BT Broadsides

Laser photographs

USE Holograms

Leaflets [755]

- PN Unbound volumes with fewer than five pages.
- UF Booklets

Brochures Circulars

- Fliers
- RT Books
- Pamphlets

Leather photographs [755]

- PN Photographs on leather, such as collodion positives on japanned leather or carbon transfers on white or light-colored leather.
- UF Collodion positive photographs
- BT Photoprints

Legal photographs [655]

- PN Photographs intended for use in a legal proceeding as valid evidence. May also be intended to aid a legal investigation by providing identification of a person or documentation of fingerprints, a crime scene, or surveillance.
- UF Crime photographs Forensic photographs
- BT Photographs
- Legends, Identification

USE Identification keys

Lenticular photographs [755]

- PN Photographs formed and viewed through lenticular screens (transparent sheets, usually plastic, embossed with a pattern of tiny lens segments). Applications include additive color processes (introduced 1909) and stereoscopic systems in which an image appears to be threedimensional.
- UF Three-dimensional photographs
- BT Photographs
- RT Stereographs >

Letter pictures [655]

- PN Designs in which words or the letters of a word are arranged to form a picture or decorative pattern or figure.
- UF Calligrams
- RT Calligraphy
- Letter sheets
 - USE Letterheads

Letterheads [655]

- PN Sheets for writing letters which include printed headings, such as the name and address of a person or organization, or an illustration.
- UF Illustrated letter paper Letter sheets Pictorial letter sheets
- BT Stationery

Letterpress works [755]

- PN Sheets or pages of text printed from metal, wood, or other type. May include woodcut or photomechanical line or halftone illustrations. Superseded for commercial use in the mid-1900s by offset photomechanical processes.
- BT Relief prints
- Lift-ground aquatints USE Sugar-lift aquatints

Lift-ground etchings USE Sugar-lift aquatints

Limited editions [755]

- PN Prints, photographs, and other works produced in a stated number of copies after which no more are made. Usually numbered consecutively, e.g., 5/100 (the fifth print in an edition of 100).
- CN In Printing & Publishing Evidence, the term LIMITATION STATEMENTS is used instead of LIMITED EDITIONS.
- UF Editions, Limited

Line block prints

USE Line photomechanical prints

Line photomechanical prints [755]

- PN Prints made from photomechanical relief blocks or lithographic plates of engravings, drawings, and other works that consist of just two tones: the background and the image. The image may be composed of solid dark areas as well as lines, but it lacks tonal gradations. No screen markings. Also called line engravings and line cuts.
- UF Line block prints Process line engravings
- BT Photomechanical prints
- Linen labels

USE Textile labels

Linocuts [755]

- PN Prints made from linoleum blocks. Can be difficult to distinguish from cellocuts.
- UF Linoleum cut prints
- BT Relief prints

Linoleum blocks [655]

BT Printing blocks

Linoleum cut prints USE Linocuts Lithographic stones USE Printing stones

Lithographs [755]

CN Used in a note under CHROMOLITHOGRAPHS.

Marker works [755]

- PN Drawings and other works made by either water-based or petroleum-based ink from a felt, nylon, or ceramic tip pen.
- BT Ink drawings Pen works

Markings

USE Marks >

Marks [755]

- PN Marks in, on, or applied to works; not usually considered part of the visual imagery; often an aid to dating or establishing provenance.
- UF Markings

NT Blind stamps Dealers' marks Emblems Inscriptions > Ownership marks > Registration marks Seals Tax stamps Trademarks Watermarks

Marriage certificates [655]

BT Certificates

Matchcovers [655]

- PN Covers to contain packs of matches; usually paper. Introduced in 1892. Matches may or may not be present.
- BT Packages

Measured drawings [655]

- PN Drawings of an existing site or structure made to scale and dimensioned from site notes, measurements, or photogrammetric analysis. Often comprise a set of plans, elevations, sections, and details. Occasionally, they are perspectives or exploded drawings. Examples include the work of the Historic American Buildings Survey.
- UF Drawings, Measured Survey drawings
- BT Design drawings
- RT Mechanical drawings

Mechanical drawings [655]

- PN Drawings prepared with mechanical devices, such as compasses, ruling pens, and other drafting tools, according to strict scales, conventions, proportions, and projection methods.
- UF Drawings, Mechanical Technical drawings
- BT Design drawings
- RT Measured drawings

Mechanical systems drawings [655]

- PN Graphic delineations for design, layout, installation, and at times operation and maintenance of the mechanical systems in a structure. They include plumbing (water supply and sanitary waste), heating, ventilating, air conditioning, and transport (elevator, escalator, dumb waiter) systems.
- UF Drawings, Mechanical systems
- BT Design drawings

Mechanical works [755]

- PN Works with moving parts, such as pop-out or sliding sections, turning wheels, or flaps that unfold to reveal new aspects of a picture. Also, works that require an action, such as turning them, to reveal the whole or another image.
- UF Movable works
- BT Novelty works
- NT Hidden image works > Metamorphic pictures

Megalethoscope photoprints [755]

- PN Photoprints on thin paper specially mounted on a curved frame for viewing in a megalethoscope, a large device with a magnifying lens designed for daylight or artificial light use. Introduced in the 1860s; often used for parlor entertainment; usually 12 in. (30 cm.) wide.
- BT Photoprints

Melainotypes USE Tintypes

Membership cards [655]

BT Cards

Membership certificates [655]

- PN Documents issued to certify membership in clubs, honor societies, fire companies, military, or other organizations.
- BT Certificates

Memorabilia [655]

- PN Three-dimensional objects which cannot be otherwise categorized. Examples include political campaign pencils and souvenir paperweights.
- UF Souvenirs
- BT Ephemera
- RT Badges

Memorial works [655]

- PN Prints, cards, black-edged stationery, and other items produced in memory of a deceased person. Prints marking the anniversary of the death of a public figure are included.
- UF Mourning works
- RT Commemorative prints

Menus [655]

- PN Lists of the dishes that may be ordered in an eating establishment or that are to be served at a banquet or other occasion.
- UF Bills of fare
- BT Ephemera
- Metal cuts [755]
 - PN Prints printed in relief from metal plates usually attached to wood blocks; chiefly ca. 1450-1500.
 - UF Dotted prints
 - BT Relief prints

Metalpoint drawings [755]

- BT Drawings
- NT Silverpoint drawings

Metamorphic pictures [755]

- PN Pictures which can be transformed into one or more other pictures by turning, folding, or sliding a section. Also, pictures with interchangeable parts, such as sets of heads, torsos, and legs, which can be combined to make different figures.
- UF Reversible head prints Transformation pictures
- BT Mechanical works

[Method of representation See this term in the Classed Display.]

 - Opaque microcopies
- BT Microforms

Microphotographs [755]

- PN Photographs of objects shown at greatly reduced size; requires magnifying glass or other magnification device to view.
- BT Microforms Photographs
- NT Microfiches Microfilms Stanhopes

Microprints

USE Microopaques

Miniature works [755]

- PN Graphic materials which are very small in comparison to the usual size of their genre or physical type.
- UF Gem photographs
- NT Miniatures
- RT Microforms >

Miniatures [755]

- PN Very small (usually five inches or less) painted portraits or scenes; commonly in egg-tempera on parchment, vellum, enamel, or ivory. For miniatures such as those in medieval and Renaissance manuscripts, search under ILLUMINA-TIONS.
- BT Miniature works Paintings

Mixed media [755]

- PN Works combining techniques and materials from two or more graphic or fine art processes no one of which clearly predominates. Examples include prints with lots of drawing and photographs with heavy over-painting.
- CN For works combining more than one process within a general medium category, use the general category name. For example, for a print comprised of etching and engraving, use INTAGLIO PRINTS. For a drawing of ink, crayon, and water-color, use DRAWINGS.
- UF Multiple processes
- RT Constructions > Drawings > Paintings > Photographs > Prints >

Money [655]

- PN Paper money designed to circulate as medium of exchange. Examples include national and colonial government notes; bank notes; and merchant, military, and local government scrip.
- UF Currency Paper money
- BT Ephemera
- NT Bank notes Scrip
- RT Bank note vignettes

Monochromatic works [755]

- PN Graphic delineations which are purely white or light and dark values of a single color.
- CN Do not use for black-and-white images. Used in a note under PAINTINGS.
- NT Cyanotypes > Lithotints Vandyke photoprints

Monograms [755]

- PN Characters or ciphers usually composed of two or more combined or interwoven letters; usually represent a name or part of a name.
- BT Inscriptions

Monotype prints [755]

- PN Prints made by painting an image on glass, metal, or other sheet, or by applying ink and wiping parts away, then transferring the image to paper. Usually no more than one or two impressions are made.
- BT Planographic prints

Montages [755]

- PN Composite pictures made by bringing together into a single composition a number of different pictures or parts of pictures and arranging these by superimposing one on another so they form a blended whole. Pieces are physically rather than optically combined, but there is more of an attempt to conceal the separations than in a collage.
- BT Constructions
- RT Photomontages

Motion picture stills [655]

- PN Photographs made during the production of a motion picture that show scenes from the movie; usually for publicity purposes.
- UF Movie stills
 - Publicity stills
- BT Photographs

Motion study photographs [755]

- PN Photographs, either single images or sets, made by one of several techniques for recording successive phases of a motion. For example, successive exposures made by separate cameras set up along the path of a moving subject; successive exposures made by one camera but that result in separate images; successive exposures that result in a single image through intermittent illumination of the subject.
- UF Chronophotographs Multiple flash photographs Pulsed-light photographs Stroboscopic photographs Time-lapse photographs

RT Airbrush works Brush works Mixed media

Palladiotypes USE Palladium photoprints

Palladium photoprints [755]

- PN Photoprints on paper sensitized with palladium salts. Introduced during World War I when platinum became prohibitively expensive; not commercially available after the 1920s.
- UF Palladiotypes
- BT Photoprints

Pamphlet illustrations USE Book illustrations

Pamphlets [755]

- PN Published non-periodical volumes with no cover or with a paper cover. Usually five or more pages and fewer than 49.
- UF Booklets
- RT Books Leaflets

Panel card photographs [755]

- PN Card photographs; mounts measure approximately 13 x 7.5 in. (33 x 19 cm.). Variant sizes include 17 x 10.5 in. (43 x 27 cm.) and 23 x 14 in. (59 x 35 cm.).
- BT Card photographs

Panoramic maps

USE Bird's-eye view prints

Panoramic photographs [755]

- PN Photographs which are a continuous view of a wider section of the horizon than could normally be photographed in a single exposure. May be separate photographs either joined (or meant to be joined) together or one long piece made with a special camera.
- UF Cirkut camera photographs
- BT Panoramic views Photographs

Panoramic views [655]

- PN Views that cover more area than usually can be seen in a single glance.
- UF Balloon views Views, Panoramic
- NT Panoramic photographs
- RT Bird's-eye views > Cityscapes > Landscapes > Waterscapes >

Pantins [655]

- PN Paper dolls produced in France in the 1600s and 1700s; often jointed.
- BT Paper dolls

Paper dolls [655]

- PN Figures on paper or cardboard with several parts or different costumes; usually issued on one sheet or in a booklet and intended to be cut out.
- BT Toys
- NT Pantins

Papercuts

USE Cut paper works

Pastel drawings [755]

- PN Drawings made with colored sticks of chalk in a nongreasy binder (usually gum arabic).
- BT Drawings

Pastel paintings [755]

- PN Paintings made with colored sticks of chalk in a nongreasy binder (usually gum arabic).
- BT Paintings

Patent drawings [655]

- PN Design drawings that describe something in order to obtain patent protection; often mechanical drawings or diagrams.
- UF Drawings, Patent
- BT Design drawings

Pattern books [655]

- PN Books, pamphlets, or other volumes consisting of designs intended to be used as outlines from which to make something.
- BT Design drawings

Pattern sheets [655]

- PN Sheets drawn or printed with designs used as outlines or guides to make something. Examples include dress making, embroidery, and carpentry patterns.
- BT Design drawings
- NT Cartoon patterns
- RT Transfer sheets

Pen works [755]

- NT Marker works
- RT Drawings >

Pencil works [755]

RT Drawings >

Periodical illustrations [655]

PN Detached illustrations are included as well as original drawings, photographs, and prints intended for publication or actually published as illustrations in periodicals.

- UF Magazine illustrations
 - Newspaper illustrations
- BT Illustrations
- NT Editorial cartoons Fashion plates

Periodicals [655]

- PN Serials usually issued at regular intervals and more frequently than annually.
- RT Comic books

Perpetual calendars [655]

- PN Calendars based on mathematical calculations with days and weeks arranged so that the correct day of the week can be determined for any given date for a wide range of years.
- BT Calendars

Perspective projections [655]

- PN Projections in which three-dimensional subjects are represented on two-dimensional surfaces so that the effect is the same as if the actual scene were observed. That is, the projectors converge towards the eye of the observer. Frequently done without complete dimensional accuracy.
- BT Projections
- RT Renderings

Photoceramics

USE Ceramic photographs

Photocopies [755]

- PN Typically, quick copy reproductions of textual documents, photographs, or other items made through an electrostatic or other electrophotographic process. Introduced commercially in 1948. Examples include prints from office copiers and microfilm readers. Also, original works produced with Xerox and other quick copy machines.
- UF Electrostatic photocopies Xerographs
- BT Photoprints
- NT Copy art
- RT Reproductions >

Photoengravings [755]

- PN Limited here to prints made by photoglyphy, photogalvanography, etched daguerreotype plates, or other methods of obtaining an intaglio or relief printing plate from a photograph before the commercial viability of the line and halftone photomechanical print processes in the 1880s.
- BT Photomechanical prints

Photoglypties

USE Woodburytypes

Photograms [755]

- PN Photographs made by laying objects on photographic paper or film and exposing it to light.
- UF Rayographs Schadographs Vortographs
- BT Photographs

Photograph albums [655]

- PN Albums specially designed to hold photographs or albums containing photographs. Both empty and filled albums are included.
- BT Albums
- NT Card photograph albums

Photograph cases [655]

- PN Decorative containers for one or several photographs. Primarily made from 1840s-1860s, usually of leather, paper-covered wood, gutta percha, or thermoplastic material and hinged; mostly for ambrotypes and daguerreotypes.
- CN Use for empty cases or for cases to which access through the catalog is desirable.
- UF Cased photographs
- BT Packages

Photographs [755]

- PN The word PHOTOGRAPHS is a general designation for any The narrower terms include both photographic process. physical and genre categories.
- CN Whenever possible, use a more specific term. The six basic narrower terms are AMBROTYPES, DAGUERREOTYPES, PHOTO-NEGATIVES, PHOTOPRINTS, PHOTOTRANSPARENCIES, and TINTYPES. When using a term that includes the word PHOTOGRAPHS, also index under a more specific physical process name, if desired. Also see this term in the Hierarchical Display.

Photogravures [755]

- PN Prints which faithfully imitate photographs or other continuous tone originals. Hand-pulled prints from plates with an aquatint grain have an irregular pattern of dotting; prints from screened gravure plates have a regular pattern of dots but, unlike halftone prints, ink varies in density. Introduced in 1879.
- UF Gravures
- BT Photomechanical prints
- RT Rotogravures

Photolithographs [755]

- PN Limited here to prints made directly from stones or zinc plates to which the image was photographically transferred. One such process was patented in the United States in 1858. For offset photolithography, search under OFFSET PHOTOMECHANICAL PRINTS.
- BT Photomechanical prints
- RT Lithographs >

Photomechanical prints [755]

Physiognotrace works USE Physionotrace works

Physionotrace works [755]

- PN Drawings produced by tracing an image made by a physionotrace. Also, works made from such tracings, such as engraved silhouettes.
- UF Physiognotrace works
- RT Tracings

Pictorial letter sheets USE Letterheads

Picture puzzles [655]

- PN Pictures in which figures or objects are incorporated but are not readily apparent, for example, animal shapes hidden in trees or in a landscape.
- BT Puzzles
- RT Hidden image works >
- Pinhole camera photographs [755]
 - BT Photographs

Pinatypes

USE Dye transfer photoprints

Placards

USE Posters

Planning drawings [655]

- PN Design drawings for local, city, regional, and other planning projects and their components. Distinguished from architectural, engineering, and landscape architecture drawings chiefly by the designation 'planner' for the person or firm which produces or oversees them.
- UF City planning drawings Drawings, Planning Urban planning drawings
- BT Design drawings

Planographic prints [755]

- CN Used in a note under PRINTS.
- BT Prints
- NT Lithographs > Monotype prints Stencil prints >
- RT Photomechanical prints >

Plans [655]

- PN Graphic delineations of a site, structure, or object in a horizontal projection. Projection lines are parallel to the picture plane rather than in perspective.
- BT Projections
- NT Floor plans Site plans
- Sile pian
- RT Maps >

Planting drawings

USE Landscape architecture drawings

Plates, Printing

USE Printing plates

Platinotypes

USE Platinum photoprints

Platinum photoprints [755]

- PN Photoprints on paper sensitized with platinum salts. Introduced commercially in 1879 as Platinotypes. Papers manufactured until around World War I; revived since the 1960s by photographers who coat their own paper.
- UF Platinotypes
- BT Photoprints

Plats [655]

- PN Maps showing land boundaries, subdivisions, ownership, and all data essential to describe and identify units shown thereon. After about 1900, that were subject to the approval of the local record office or building authority, and include one or more certificates indicating due approval. Does not necessarily show relief, drainage, or cultural features.
- BT Maps

Playbills [655]

- PN Programs printed on one sheet or in booklets for plays or theatrical entertainments.
- BT Programs
- RT Broadsides >

Playing cards [655]

- PN Cards made in sets of a designated number of cards and marked for use in playing one or more games or telling fortunes; marks may follow a standard suit and rank system or may be special designs.
- BT Cards
- NT Fortune telling cards
 - Game cards
- RT Games >

Portraits [655]

- PN Graphic representations, especially of the face, of real persons, usually posed, living or dead. Pictures whose purpose is the portrayal of an individual or several people, not pictures which merely include people as part of an event or scene.
- NT Group portraits > Portrait drawings Portrait paintings Portrait photographs > Portrait prints Self-portraits
- RT Caricatures Silhouettes

Post cards

USE Postcards >

Postage stamps [655]

- PN Government-authorized hand stamps, adhesive stamps, or meter markings intended as evidence of payment of postage. Also, stamps issued by private mail delivery companies to denote payment of their delivery fees.
- UF Stamps, Postage
- BT Ephemera

Postal cards [655]

- PN Postcards with preprinted postage.
- BT Postal stationery Postcards

Postal stationery [655]

- PN Cards, envelopes, aerograms, and other stationery imprinted with postage indicating prepayment; sold by an official postal service.
- BT Stationery
- NT Postal cards

Postcards [655]

- PN Cards on which a message may be written or printed for mailing without an envelope; often include a pictorial, comic, or other scene on one side.
- UF Mailing cards Post cards
- BT Cards
- NT Postal cards
- RT Souvenir viewbooks Stationery

Posters [655]

- PN Single or multi-sheet notices made to attract attention to events, activities, causes, goods, or services. The purely decorative posters made since about 1960 are included. For posting, usually in a public place; chiefly pictorial. Intended to make an immediate impression from a distance.
- CN Used in a note under ADVERTISEMENTS and HANDBILLS.
- UF Placards
- NT Billboard posters
- RT Ephemera >

Programs [655]

- PN Brief, usually printed outlines of the order to be followed, of feature(s) to be presented, and of person(s) participating in a public exercise, performance, or entertainment.
 BT Ephemera
 - NT Playbills

Progress photographs [655]

- PN Series of photographs made at intervals from generally the same vantage points showing construction, renovation, or demolition of a structure, such as a building, bridge, park, sculpture, or other site or object as it progresses.
- UF Construction progress photographs
- BT Photographs

Progressive proofs [755]

- PN In printmaking, sets of proofs showing color printing in successive stages from first color to finished print, with one superimposed over the other. Also, sets showing each color separately as well as in final combination.
- UF Successive proofs
- BT Prints Proofs

Projections [655]

- PN Graphic representations based on or demonstrating any of several spatial projection theories or techniques for delineating objects or views. Imaginary sight lines (projectors) extend from the eye of the observer to the object being depicted. The projectors create an image of the subject on an imaginary plane between the observer and the subject. Depending on the sight lines used, the subject is shown realistically or tilted or otherwise altered to emphasize particular features. Usually only partial dimensional accuracy.
- CN Used in a note under ARCHITECTURAL DRAWINGS.

NT Axonometric projections >

Elevations Exploded drawings Perspective projections Plans > Sciagraphic projections Sections >

RT Bird's-eye views > Design drawings >

Promenade card photographs [755]

PN Card photographs; mounts measure approximately 7 x 4 or 7.5 x 4 in. (18 x 11 or 19 x 11 cm.). Introduced ca. 1874.

BT Card photographs

Proofs [755]

- PN In printmaking, impressions taken at any stage from a plate, block, or stone, but not considered part of the edition. In photography, photoprints made as quick records of a negative or for clients to choose from, as with studio portraits.
- NT Artists' proofs Contact sheets Counterproofs Progressive proofs Proofs before letters Trial proofs

- UF Awards of merit
- BT Ephemera
- RT Certificates >
- Ribbon badges

USE Badges

Rolls

USE Scrolls

Rotogravures [755]

- PN Prints in which an unobtrusive cross line screen breaks up the image that is then printed from a rotating cylinder. Introduced ca. 1895 and commonly used for newspaper illustrations. Especially suitable for long printing runs at high speed; inks frequently brown or sepia.
- UF Gravures
- BT Photomechanical prints
- RT Photogravures

Rubbings [755]

- PN Impressions made by rubbing charcoal, graphite, or a similar substance across a sheet of paper placed on a surface, portions of which stand out in relief.
- BT Relief prints

Sabattier effect photographs USE Solarization photographs

Sacks

USE Bags

Safety film photonegatives USE Film photonegatives >

Sailing cards USE Ship cards

Salt prints USE Salted paper photoprints

Salted paper photoprints [755]

- PN Limited here to photoprints in which the silver particles are in the paper rather than on the surface in a gelatin or other matrix; introduced in 1839; in use through 1860s.
- UF Salt prints
- BT Photoprints

Sample books [655]

- PN Albums or other volumes with type face specimens, paint chips, swatches of cloth, or stereograph views, or other samples.
- UF Specimen books
- BT Samples
- RT Albums >

Catalogs >

Samples [655]

- PN Books, pamphlets, or other volumes, sheets, or packages containing samples of designs or materials which can be purchased from particular manufacturers or printers. Examples include single sheets made to exhibit the type of work a commercial printer produces and small packages for toothpaste, detergent, or other advertising samples.
- BT Ephemera
- NT Sample books

Satires [655]

- PN Graphic commentaries critical of the failings, weaknesses, and morals of the people, governments, or organizations depicted.
- BT Cartoons

Schadographs

USE Photograms

Schedules [655]

- PN Lists showing times of departure and arrival and scheduled stopping points between two terminals.
- UF Timetables
- BT Charts
 - Ephemera

Schedules (Contract documents) [655]

- PN Detailed tabulations on architectural and similar working drawings or on separate sheets that indicate dimensions, materials, or fixtures required at various points in the design.
- BT Charts Specifications

Scherenschnitte

USE Cut paper works

Sciagraphic projections [655]

- PN Two-dimensional graphic representations with shadows projected according to specific conventions in regard to the source of light. The projectors of the shadows are usually fixed as the diagonal of a cube from the top left corner to the bottom rear corner and at an angle of 45 degrees in plan and elevation.
- UF Shades & shadows
- BT Projections

Scientific illustrations [655]

- PN Illustrations characterized by great detail and exactitude, suitable for scientific study or identification of organisms. Component parts are often labeled; may expose parts as in a dissection.
- UF Technical drawings
- BT Illustrations

Scissorcraft

USE Cut paper works

Scrapbooks [655]

- PN Albums containing or intended to contain a variety of material, especially clippings, but also ephemera, or some photoprints.
- BT Albums Ephemera
- Scraperboard drawings

USE Scratchboard drawings

Scraps [655]

- PN Die-cut decorations, usually embossed chromolithographs printed in sheets from which each scrap can be broken off to paste on calling or greeting cards, album pages, or other places. Some sheets, up to a foot long, contain a single figure or scene. Popular from mid- to late 1800s; many made in Germany. Wide variety of designs includes flowers, animals, children, ships, and famous people.
- BT Decorations Ephemera

Scratchboard drawings [755]

- PN White line drawings made by scratching with a stylus or other tool through a coating of black ink on a white, clay coated cardboard. Introduced in the 1800s; widespread commercial use for images which are to be reproduced.
- UF Scraperboard drawings
- BT Drawings

Screen color film phototransparencies [755]

- PN Additive color process phototransparencies introduced commercially in the 1930s. Tradenames include Filmcolor (replaced Autochromes) and Dufaycolor which survived into the 1950s.
- UF Color screen phototransparencies Dufay color phototransparencies
- BT Film phototransparencies

Screen color glass phototransparencies [755]

- PN Additive color process phototransparencies available commercially from 1895-1930s.
- UF Autochromes Color screen phototransparencies Dufay color phototransparencies Finlay color phototransparencies
- BT Glass phototransparencies

Scrip [655]

PN Limited here to money issued by businesses, military organizations, or local (rather than national) governments, often as payment of wages or to provide small change. BT Money

Scrolls [755]

- PN Illustrated sheets of paper or cloth, much longer in one dimension than the other; meant to be rolled up when not in use.
- UF Rolls

Seals [755]

- PN Wax or embossed devices with a cut or raised emblem, symbol, or word; chiefly used to certify a signature or authenticate a document.
- BT Marks

Seascapes

USE Waterscapes

Sections [655] PN Graphic delineations of a vertical, horizontal, or oblique slice through a site, structure, or object. They demonstrate the shape and disposition of interior spaces, chambers, and structural or other components showing their placement, proportions, and dimensions. BT Projections NT Floor plans Security engravings USE Bank note vignettes Self-portraits [655] PN Representations by the creator of the image of his own self. BT Portraits Sentiment cards [655] PN Cards printed with a word or a brief phrase of love, friendship, or other feelings. The size of visiting cards. BT Cards Separation photonegatives USE Color separation photonegatives Separation phototransparencies USE Color separation phototransparencies Serigraphs USE Silkscreen prints Set design drawings [655] PN Graphic delineations made for the design and production (or documentation of design and production) of stage settings for theatrical, movie, broadcast, or other performing arts productions. BT Design drawings Shades & shadows USE Sciagraphic projections [Shape & size See this term in the Classed Display.]

Sheet music covers [655]

- PN Covers or first pages of unbound songs and other pieces of music on eight or fewer pages. Included are covers which have been detached from the music as well as those which are still attached.
- UF Music sheet covers
- BT Music title pages

Ship cards [655]

- PN Printed cards made to attract freight consignments or passengers to ships preparing to depart in the days when ships left when they had a full load rather than at times scheduled well in advance. A picture of the vessel is often included; chiefly for clipper ships 1850s-1860s; commonly 4 x 6.5 in. (10 x 16 cm.).
- UF Clipper ship cards Sailing cards
- BT Advertising cards

Signs [655]

- PN Lettered boards or other displays used to give directions or information, to identify a place of business or public facility, or give warnings or directions. Textual or symbolic rather than pictorial.
- BT Ephemera
- NT Banners
- RT Broadsides > Display cards Posters >

Silhouettes [655]

- PN Images shown in profile in a single hue against a contrasting background; cut, drawn, painted, printed, or photographic; often portraits.
- RT Portraits >
- Silk screen prints

USE Silkscreen prints

Silkscreen prints [755]

- PN Prints made by forcing ink through a fine screen stencil onto paper or another surface. Art applications date from the 1930s; commercial ones from the 1920s. Examples include many posters and book dust jackets.
- UF Serigraphs Silk screen prints
- BT Stencil prints

Silver gelatin glass phototransparencies [755]

- UF Gelatin silver phototransparencies
 - BT Glass phototransparencies

Silver gelatin photoprints [755]

- PN Photoprints made by several formulas, the earliest introduced in the 1880s; dominant black-and-white photoprint process since the 1890s. Various common developing-out papers that are very difficult to distinguish by visual inspection (e.g., bromide, chloride or gaslight, and chloro-bromide) and one printing-out process are included.
- UF Aristotypes Bromide photoprints Chloro-bromide photoprints Gaslight photoprints Gelatin silver photoprints
- BT Photoprints
- NT Resin-coated paper photoprints Silver gelatin printing-out paper photoprints

Silver gelatin printing-out paper photoprints [755]

- PN Introduced in the 1880s; still marketed as studio proof paper.
- CN Virtually indistinguishable by visual inspection from the glossy COLLODION PRINTING-OUT PAPER PHOTOPRINTS used in the 1880s-early 1890s. If in doubt, use PHOTOPRINTS. Used in a note under COLLODION PRINTING-OUT PAPER PHOTOPRINTS.
- UF Studio proof paper photoprints
- BT Silver gelatin photoprints

Silverpoint drawings [755]

BT Metalpoint drawings

Simulated images

USE Combination photoprints Computer graphics >

Site plans [655]

- PN Design drawings, especially architectural, landscape, and planning drawings, that are plans showing the boundaries, outlines, dimensions, contours, positions, and other characteristics of a defined area and its structures, buildings, plantings, and other physical features and improvements.
- UF Plot plans
- BT Design drawings Plans
- RT Landscape architecture drawings

Sketchbooks [655]

PN Albums of drawings or paintings on pages bound together before the images were created.

- UF Sketchpads
- BT Albums

Sketches [655]

- PN Rough drawings or paintings representing the chief features of objects or scenes; often made as quick records of a scene, object, or idea, or as a preliminary to a study for a larger work.
- RT Design drawings > Studies
- NT Travel sketches

Sketchpads

USE Sketchbooks

Slides [755]

- PN Transparent materials on which there is a drawn image or a positive photographic image; intended to be bound or held in a mount and usually designed for use in a projector or viewer.
- BT Transparencies
- NT Lantern slides
- RT Phototransparencies >

Snapshots [655]

- PN Photographs which seem to have been made without artistic pretensions; often made quickly with amateur equipment as a remembrance of people, places, or occasions.
- BT Photographs
- RT Amateur works

Soft-ground etchings [755]

BT Etchings

Solarization photographs [755]

- PN Photographs in which negative and positive values have been reversed in some areas, usually as a result of a long exposure. For example, a bright street lamp at night appears as a black spot rather than a bright spot. They include photonegatives or photoprints that exhibit the Sabattier effect caused by exposure to light during darkroom development, which reverses values of some areas of the image.
- UF Sabattier effect photographs
- BT Photographs

Souvenir albums [655]

- PN Personal albums made by individuals in remembrance of particular occasions or trips; not commercially published volumes with the word "album" in the title. Images may have been purchased for inclusion in the album.
- BT Albums Ephemera
- RT Keepsakes Souvenir viewbooks

Souvenir booklets USE Souvenir viewbooks

Souvenir viewbooks [655]

- PN Published booklets and other volumes primarily consisting of views of particular places, events, and activities. May be photographs, photomechanical prints, postcards, etc.; may be connected by accordion folds.
- UF Booklets Souvenir booklets Viewbooks, Souvenir
- BT Ephemera
- RT Keepsakes Postcards > Souvenir albums

Souvenirs

USE Keepsakes Memorabilia

Space photographs [755]

- PN Photographs taken from a vehicle or by a person beyond the earth's atmosphere. Photographs taken by astronauts with conventional cameras are included, as well as images made by digital scanners and transmitted to earth by radio signals for computer processing.
- UF Digital images
- RT Computer graphics > Photographs > Transmitted images

Speakeasy cards [655]

- PN Identification cards which admitted the bearer to a speakeasy during the American prohibition era (1920-1933). Often appear to be a club membership card or contain only cryptic markings and the signature or initials of the person vouching for the card bearer.
- BT Cards

Specifications [655]

- PN Textual or graphic documents, schedules, and notes which amplify working drawings and give detailed information and instruction concerning materials, finishes, and workmanship.
- NT Schedules (Contract documents)
- RT Design drawings >

Specimen books

USE Sample books

Spirit photographs [655]

- PN Photographs in which deliberate partial exposure of persons or objects causes them to appear like ghosts.
- CN Do not use for photographs in which long exposure times have caused moving figures to be partly obliterated unintentionally.
- UF Ghost photographs
- BT Photographs

Sports cards [655]

- PN Advertising or collecting cards issued since the 1880s to encourage or satisfy interest in sports. Examples include baseball, football, and basketball cards issued by bubble gum, bread, tobacco, and milk producers, among others.
- BT Cards
- RT Advertising cards > Collecting cards

Stabilization photoprints [755]

- PN Photoprints processed rapidly in a machine which develops the image but does not provide adequate fixing and washing to prevent subsequent fading and other deterioration. Often found in news agency or newspaper photo morgues.
- BT Photoprints
- Stamps, Blind

USE Blind stamps

Stamps, Postage USE Postage stamps

Stamps, Tax

USE Tax stamps

Stanhopes [755]

- PN Photographs mounted under a magnifying glass about .12 in. (.3 cm.) across. Often in a ring or other jewelry; especially popular in the 1860s.
- BT Microphotographs

State proofs

USE Trial proofs

Stationery [655]

- PN Materials on which letters and similar communications are typed or written.
- BT Ephemera
- NT Billheads Greeting cards > Letterheads Postal stationery >
- RT Envelopes Postcards >

Stats [755]

- PN Negative or positive image paper photographic reproductions made with a photostat machine. Used for art layouts or any situation in which quickly made, high-contrast copies are needed whether same size, enlarged, or reduced.
- UF Photostats
- BT Photographs Reproductions
- RT Paper photonegatives > Photoprints >

[Status of production See this term in the Classed Display.]

Stencil prints [755]

- BT Planographic prints
- NT Pochoir prints Silkscreen prints

Stencils [655]

BT Equipment

Stereograms

USE Stereographs >

Stereographs [755]

- PN Two nearly identical photographs, photomechanical prints, or other graphics paired to produce the illusion of a single three-dimensional image. The effect is usually viewed with the aid of a stereoscope. Typically, photoprints on cardboard mounts of standard sizes, but may be daguerreotypes, glass or film transparencies, photonegatives, halftones, or other processes. Card mounts commonly 3.5 x 7 in. (9 x 18 cm.) up to 5 x 7 in. (12 x 18 cm.). Commercially popular in the United States 1850s-1920s.
- CN Use even if only half of the stereograph is present. As desired, also index under the type of process, such as DAGUERREOTYPES.
- UF Stereograms Stereoscopic views Stereoviews Three-dimensional photographs Viewmaster cards
- NT Anaglyphs Tissue stereographs
- RT Card photographs > Lenticular photographs Photographs > Photomechanical prints >

Stereoscopic views

USE Stereographs >

Stereoviews

USE Stereographs >

Stickers [655]

- PN Messages or designs on slips of paper that are gummed or otherwise treated to adhere to a surface.
- BT Labels
- NT Decals

- Still life drawings [655] BT Drawings Still lifes
- Still life paintings [655] BT Paintings Still lifes
- Still life photographs [655] BT Photographs Still lifes
- Still life prints [655] BT Prints Still lifes
- Still lifes [655]
 - PN Graphic representations of inanimate objects selected and arranged by the artist or photographer for a specific pictorial effect.
 - NT Still life drawings Still life paintings Still life photographs Still life prints

Stipple prints [755]

- PN Prints in which the design consists of dots or flecks, usually in addition to line work. An engraving or etching technique, but usually printed as relief prints.
- BT Prints
- RT Relief prints >
- Stock cards [655]
 - PN Advertising cards that can be used by any business because they are printed with an area left blank for local retailers to add their name or other information.
 - BT Advertising cards

Stock certificates [655]

- PN Documents evidencing ownership of one or more shares of the capital stock of a corporation.
- CN Used in a note under EPHEMERA.
- BT Certificates

Stones, Printing

USE Printing stones

Street cries USE Cries

Stroboscopic photographs USE Motion study photographs

Structural systems drawings [655]

- PN Graphic representations made for the design, construction, and assembly (or documentation of the design, construction, and assembly) of the structural support systems of a building or other structure. Features included are attributes of form (post and lintel, arch, truss) and materials, such as wood, masonry, and steel.
- UF Drawings, Structural systems
- BT Design drawings
- NT Framing drawings

Student works [655]

- PN Drawings, photographs, prints, or other works created by people for course assignments, or to gain a degree.
- RT Amateur works

Studies [655]

- PN Drawings or paintings, tending to be quite detailed, usually made in preparation for a finished composition or project. May also be made to explore a technique, material, idea, or design. A more carefully detailed representation than a sketch but less finished than a completed work.
- BT Design drawings
- RT Details Sketches >

Studio portraits USE Portrait photographs

Studio proof paper photoprints USE Silver gelatin printing-out photoprints

Submarine photographs USE Underwater photographs

Successive proofs USE Progressive proofs

Sugar-lift aquatints [755]

- PN Prints produced by an aquatint technique in which the part of the plate to be etched is exposed by dissolving the protective coating.
- UF Lift-ground aquatints Lift-ground etchings
- BT Aquatints

[Support material See this term in the Classed Display.]

Survey drawings USE Measured drawings

Talbotypes USE Calotypes

Tarot cards USE Fortune telling cards

Tax stamps [755]

- PN Revenue stamps affixed to various printed materials. Useful for dating. Required on photographs and other graphics in the United States 1864-1866. Also common on some playing card packs.
- UF Revenue stamps
 - Stamps, Tax
- BT Marks

Tear sheets [755]

- PN Sheets torn or otherwise removed from publications to prove insertion of an advertisement or an image.
- UF Tearsheets
- BT Clippings

Tearsheets USE Tear sheets

Technical drawings USE Diagrams > Mechanical drawings Scientific illustrations

Tempera paintings [755] BT Paintings

Test proofs USE Trial proofs

Textile design drawings [655]

- PN Graphic delineations made for the design and production (or documentation of the design and production) of fabrics, both woven and non-woven.
- UF Fabric design drawings
- BT Design drawings

Textile labels [655]

- PN Paper labels meant to identify lengths of cloth or cloth goods. Usually they state yardage and sometimes cloth type and manufacturer's name.
- UF Cloth labels Linen labels
- BT Labels

Thermal copies [755]

- PN Quick copy reproductions which use heat for document reproduction. Introduced commercially ca. 1950.
- BT Reproductions

Three chalk drawings USE A trois crayons drawings

Three-color carbro photoprints USE Tricolor carbro photoprints

Three-dimensional photographs USE Holograms Lenticular photographs Stereographs >

Tickets [655]

PN Slips of paper, cardboard, or other material used for admission or passage.

BT Ephemera

Tickets, Lottery USE Lottery tickets

Time-lapse photographs USE Motion study photographs

Timetables USE Schedules

Tintypes [755]

- PN Direct-image photographs in which the collodion negative supported by a dark-lacquered thin iron sheet appears as a positive image. Popular mid-1850s through 1860s; in use through 1930s. Usually small portraits.
- CN Used in a note under PHOTOGRAPHS.
- UF Collodion positive photographs

Ferrotypes Iron photographs Melainotypes

BT Photographs

Tissue stereographs [755]

- PN Photoprint stereographs on thin translucent paper mounted either between glass plates or on cards cut out to make a frame; intended for viewing as a transparency. Many were made in France; often colored.
- UF French tissues
- BT Phototransparencies Stereographs
- Title pages [655]
 - PN Pages bearing the title and usually the names of author, publisher, and date and place of publication of a book, pamphlet, portfolio, or other material. Title pages detached from and those still attached to the rest of the publication are included.
 - NT Music title pages >
 - RT Cartouches Decorations > Illustrations >

Tobacco cards

USE Cigarette cards

Tools

USE Equipment

Topographic maps [655]

- PN Maps that portray, identify, and locate natural and manmade features as precisely as possible; usually use contour lines to show variations in surface height.
 PT Maps
- BT Maps

Topographic views

USE Cityscapes > Landscapes >

Townscapes USE Cityscapes > Toys [655] PN Sheets of paper, cardboard, or other material with preprinted outlines or designs that can be cut and folded to make toys. Toys already made are included. UF Paper toys NT Paper dolls > RT Games > [755] Tracings BT Drawings RT Camera lucida works Camera obscura works Physionotrace works Trade cards USE Advertising cards > Business cards Collecting cards Trade catalogs USE Commercial catalogs Tradecards USE Advertising cards > Business cards Collecting cards Trademarks [755] PN Symbols or combinations of symbols, letters, and other characters legally reserved to identify products and makers. BT Marks Trading cards USE Advertising cards > Collecting cards Transfer sheets [755] PN Paper or other flexible sheets containing images intended for transfer to another surface by application of pressure, heat, or moisture. Examples include iron-on patterns and pictures on graphite paper. UF Iron-on transfers RT Decals Pattern sheets Transformation pictures

USE Metamorphic pictures

Transmitted images [755]

- PN Images that result from scanning other images, such as photographs, and converting them to electrical signals, which are transmitted by radio waves or other methods and then recorded by electrical, thermal, or other nonphotographic processes. Examples include news wire photographs and many space photographs.
- UF Digital images Electronic images Facsimilie transmission images Wire photographs
- RT Photographs > Reproductions > Photomechanical prints > Space photographs

Transparencies [755]

- PN Sheets of transparent material, such as glass, thin paper, or plastic, bearing a photographic, printed, or hand-drawn image and designed to be viewed by light shining through them; often intended for use with a projection device.
- NT Phototransparencies > Slides > Vues d'optique

Travel sketches [655]

- PN Sketches made of places, buildings, objects, people, or events seen during a journey; often made to record a particular feature for future reference.
- BT Sketches

Triacetate photonegatives USE Cellulose triacetate photonegatives

Trial proofs [755]

- PN Prints made before the completion of the accepted impression.
- UF State proofs Test proofs Working proofs
- BT Prints Proofs

Trichrome carbro photoprints USE Tricolor carbro photoprints

Tricolor carbro photoprints [755]

- PN Photoprints made from color separation negatives printed as three bromide prints, each of which is then pressed against a sensitized carbon tissue of the appropriate color. The tissues are then superimposed to create the final color photograph. Chiefly used ca. 1900-1930s.
- UF Three-color carbro photoprints Trichrome carbro photoprints
- BT Carbro photoprints

Trois crayons drawings USE A trois crayons drawings

Type C photoprints USE Dye coupler photoprints

Type R photoprints USE Dye coupler photoprints

Underwater photographs [755]

- PN Photographs made underwater with waterproof equipment or from a submarine or other vehicle.
- UF Submarine photographs
- BT Photographs
- Urban planning drawings USE Planning drawings
- Valentines [655]

BT Greeting cards

Vandyke photoprints [755]

- PN Photoprints made by a formula introduced in the late 1800s. In common use from the 1920s-1950s to reproduce architectural, engineering, and mechanical drawings. These mirror image photoprints, consisting of white lines on a dark brown or sepia background, may be used to make blue or black line photoprints. Revived in mid-1960s as an alternative photographic process.
- BT Kallitypes Monochromatic works
- RT Reproductions >

Vest camera photographs

USE Detective camera photographs

Victoria card photographs [755]

PN Card photographs; mounts measure approximately 5 x 3.5 in. (13 x 9 cm.). Introduced in the United States in 1870.

BT Card photographs

<pre>Video disks [755] PN Analog optical disks primarily intended for the recording of photographs, prints, drawings, or other still or motion pictures as television signals. May include sound. The images are recorded by a laser and can be displayed by a laser on a television screen. RT Reproductions ></pre>
Viewbooks, Souvenir USE Souvenir viewbooks
Viewmaster cards USE Stereographs
Views, Bird's-eye USE Bird's-eye views >
Views, Panoramic USE Panoramic views >
<pre>Visiting cards [655] PN Small cards bearing a person's name and sometimes address that are presented when making a social call or visiting. May have a portrait, scene, or decoration; may be accompanied by an envelope. UF Calling cards BT Cards RT Business cards</pre>
Vortographs USE Photograms
<pre>Vues d'optique [755] PN Prints on paper thin enough for viewing by transmitted light; common in the late 1700s in Europe for peep shows. Lettering is often in mirror image. BT Prints Transparencies</pre>
Wallpaper [655] PN Decorative paper intended to cover the walls of a room. BT Ephemera

<pre>Wash drawings [755] PN Drawings made from diluted ink or watercolor applied with a brush; usually monochromatic or two color, such as brown and gray. BT Drawings RT Brush works Ink drawings</pre>
<pre>Watch papers [655] PN Circular papers used to ensure a tight fit between inner and outer cases of a pocket watch. Often contain watch- maker's or watch owner's name. BT Ephemera</pre>
Water marks USE Watermarks
Watercolor drawings [755] BT Drawings NT Gouache drawings

Waterscape photographs [655] BT Photographs Waterscapes
Waterscape prints [655] BT Prints Waterscapes

Waterscapes [655]

- PN Broad or general views in which a river, bay, lake, ocean, ships, or similar features are prominent.
- UF Marine views Seascapes
- NT Waterscape drawings Waterscape paintings Waterscape photographs Waterscape prints
- RT Landscapes > Panoramic views >
- Waxed paper photonegatives USE Calotypes

Wet plate photonegatives [755]

- PN Dominant glass negative process from its introduction in the United States ca. 1855 until replaced by the dry plate process in the 1880s. Its use continued for photolithographic printing plates until World War II. Distinguishable in part by creamy rather than grayish black tones and by presence of flow lines from hand coating of the emulsion.
- CN Used in a note under COLLODION DRY PLATE PHOTONEGATIVES.
- UF Collodion photonegatives
- BT Glass photonegatives
- Whiteprints

USE Diazo photoprints

Wire photographs USE Transmitted images

Wood blocks [655]

BT Printing blocks

Wood cuts

USE Woodcuts

Wood engravings [755]

- PN Relief prints made from wood blocks incised on the end grain.
- UF Engravings, Wood
 - Xylographs
- BT Relief prints
- RT Woodcuts

Woodburytypes [755]

- PN Continuous tone photomechanical prints made by a carbon process introduced in the United States in 1870. Used through the 1890s, mainly for book illustrations. Difficult to distinguish from actual photoprints, although slight surface relief may be visible.
- CN Used in a note under PHOTOPRINTS.
- UF Photoglypties
- BT Photomechanical prints

Woodcuts [755]

- PN Relief prints made from wood blocks incised on the plank side.
- UF Wood cuts
- BT Relief prints
- NT Chiaroscuro woodcuts
- RT Wood engravings

Working drawings [655]

- PN Graphic delineations showing all necessary information to complete a structure, system, or site. In architecture, an umbrella term for sets of drawings including elevations, plans, and sections provided by the architect for use by the builder, electrician, plumber, or other contractor, subcontractor, or fabricator.
- UF Drawings, Working
- BT Design drawings
- NT As-built drawings

Working proofs

USE Trial proofs

Wrappers

USE Packages

X-ray photographs USE Radiographs

Xerographic art USE Copy art

Xerographs USE Photocopies >

Xylographs USE Wood engravings

Zincographs [755]

- PN Lithographs made from zinc plates rather than stones.
- BT Lithographs

II. CLASSED DISPLAY

The Classed Display consists of 10 categories which offer approaches to the thesaurus terms not available in the Alphabetical Display. The categories are: COLOR ASPECT, COMPONENT, CREATOR ATTRIBUTE, INSTRUMENT EMPLOYED, METHOD OF REPRESENTA-TION, PROCESS & TECHNIQUE, PURPOSE, SHAPE & SIZE, STATUS OF PRODUCTION, SUPPORT MATERIAL.

Each term in the thesaurus has been assigned to one or more of these groups. The broadest terms appropriate to a particular category are listed alphabetically. When the broadest term has narrower terms which are also appropriate to the category, they appear in hierarchical order under that term. Terms at the same subordinate level are in alphabetical order.

[Color aspect]

Terms for physical processes which always include color. Paintings, pastels, and watercolors which may be black or white but are predominantly color are also listed, as are monochromatic works which express another aspect of color. When color is present with processes which can be either color or black-and-white, the subdivisions --COLOR or --COLORED should be appended to the process name.

III. HIERARCHICAL DISPLAY FOR PHOTOGRAPH AND PRINT TERMS

The Hierarchical Display is limited to two terms (PHOTOGRAPHS and PRINTS) which have many layers and terms between the broadest term in the chain and its progressively narrower terms. Here, narrower terms appear in logically descending relationships rather than alphabetical order. This display allows quick scanning to broaden or narrow a search for the most appropriate photographic or printmaking term.
